Not sure if your boss will approve your $199 registration to the 2020 Child Care Aware® of America Virtual Symposium? Here are some of the reasons why the Symposium is a great investment in your professional development and value to your organization.

• The Symposium’s virtual technology allows you access to an interactive setting where you will learn and share ideas and insights with your peers from across the country without leaving home.

• You’ll benefit from 12 sessions by thought leaders and experts in the early childhood education field—not just on May 4, but afterwards at your convenience through recordings of every session. These recordings become your own personal resource library, a valuable source of information and best practices you can refer to as often as you need.

• Each session will tie into the coronavirus pandemic and its impact on the child care field. Leading early child care experts will discuss what the future holds for early care and education post-COVID-19.

• Special Bonus: Your registration fee not only includes the 12 sessions on May 4, but also provides access to an exclusive webinar later this spring with subject matter experts who will provide you with answers to your most pressing questions on the latest developments in child care. This special webinar is available only to Symposium attendees.
