  ($26,200/year for a family of 4)
- 19,002 Medicaid patients
- 8,136 uninsured patients

Health Centers serve 3,496 patients who live in zip codes in your district.
NorthLakes Community Clinic operates 14 clinics in twelve communities throughout the northern and eastern areas of Wisconsin. We provide a variety of services based on the needs of the communities we serve and work with you to help you be your healthiest. At NorthLakes we believe that everyone deserves access to high-quality affordable healthcare. All people are welcome regardless of their insurance status and ability to pay. Our services include: Behavioral Health, Chiropractic, Community Outreach, Dental, Health & Wellness Supports, Medical, Optometry, Pediatric Therapies, Prescription Services, Psychiatry and Recovery. We strive to keep people well; one of our many programs we offer is our Farm to Patient program. It connects our patients to farm fresh foods from local farmers. If a patient has financial barriers to buying fresh fruits and vegetables, or they are interested in improving their health and wellness through eating and cooking with fresh healthy foods they can be prescribed a box of farm fresh foods. Several of our NorthLakes sites earned national recognition for efforts to reduce the number of patients with uncontrolled blood pressure through the American Heart Association.
Northeast Wisconsin (N.E.W.CC) Community Clinic, under the original name, Green Bay Area Free Clinic, opened its doors on July 27, 1971, as a UW Green Bay student’s social work project. The N.E.W. CC is overseen by a volunteer community advisory board and administers ten programs; including Community Clinic program, Healthcare for the Homeless, N.E.W. CC at NWTC, and dental serving 14,000 encounters annually. Our mission is to provide access to quality, comprehensive, and compassionate health care to the underserved in our community. We have volunteer providers, along with a great partnership with our local hospitals and counseling therapists. When a patient walks through our doors we try to be a ‘one stop shop’ and work together as a team to ensure that health needs are met. We are also very proud that 59% of our patients stated that coming to our clinic prevented them from going to the ER.
Last summer, UnitedHealth Care donated a hydroponic Flex Farm system from Fork Farms to Lakeshore Community Health Care, allowing them to grow fresh greens for patients at their Sheboygan clinic. Each month the mixed greens, healthy salad additions and tips to maintain a healthy diet are shared with patients. Volunteers deliver the items to patients or they are picked up at the clinic. It has been a way to engage patients in a healthy diet and offer fresh greens to those in need of additional food.
Bridge Clinic was founded as a direct response to cultural barriers found within the community’s extensive Hmong and Southeast Asian populations. Since 1995, the clinic has added dental and behavioral health services to meet increasing needs. In 2021, the clinic will expand and begin a building project to fully integrate medical and behavioral health care. The clinic also participates in a school-based counseling service that provides Marathon County schools with in-school mental health services. Bridge Clinic has expanded its community garden program and plans to add a public garden and a community space. The garden program donates produce to the Hunger Coalition, provides free classes on healthy eating, and provides nearly 75 plots for our patients. It is the clinic’s integrated, whole person/whole food approach to care that makes it unique.
