

Paper-based or paperless?

Challenges and realities
of removing paper
from the medical record

Dr. Dana Thomas
Clinical Consultant
Orion Health

We like
paper.

Paper is physical

and representative.

Paper supports authoring work.

Paper supports
teamwork.

A male doctor with short brown hair, wearing a white lab coat over a dark tie and a white shirt, is looking down at a large, cream-colored folder he is holding with both hands. A stethoscope is draped around his neck. The background is a blurred hospital corridor with warm lighting and wooden paneling.

Paper is easy to read.

Paper facilitates patient-clinician interaction

Validate
and
Reconcile

Paper flow complements work flow

The vendor challenge
