

The Iowa Association of Municipal Utilities Gas Department and KGM will offer a one-day **Gas Metering & Measurement Training Workshop**. The class will take place on **Wednesday, December 18** at the IAMU Training and Office Complex.

GAS MEASUREMENT PRODUCTS & SERVICES

Why You Should Attend:

This training opportunity provided by IAMU and KGM Gas Measurement Products & Services is designed to provide natural gas personnel, regardless of experience, with a very specialized, in-depth training into natural gas metering and measurement. Proper natural gas measurement is critical to your utility's success! Without the proper knowledge and understanding of natural gas measurement and measurement principles, your utility's lost and unaccounted for gas may be inaccurate, you may receive customer complaints of "not enough gas" due to improper meter sizing, or you may be losing money due to inaccurate metering.

After attending this specialized training opportunity, gas personnel will have a better understanding of the following metering and measurement topics:

Diaphragm Meters:

- Measurement & index types
- How they work & operate in the field
- Q&A on measurement & "How To" out in the field

Rotary Meters:

- Measurement & index types
- Index variations based on field applications
- Q&A on measurement & "How To" out in the field

Ultrasonic Meters:

- Q&A on measurement based on field applications & "How To" out in the field

Field Meter Proving:

- Run tests on large capacity diaphragm meters
- Run tests on large capacity rotary meters
- Run tests on ultrasonic meters
- Q&A on field proving related topics

Where and When:

IAMU Training and Office Complex
1735 NE 70th Avenue
Ankeny, IA 50021

Wednesday, December 18
9:00 - 3:00 p.m.
