

OSHA 10-Hour Construction Outreach Course

January 23 - 24, 2019

IAMU SAFETY SERVICES
Education, Training, & Consultation to Keep You Safe

presented by IAMU Safety Services
(authorized OSHA instructors)

This course will explain OSHA's role in worker safety and health, jobsite hazard recognition, correction and prevention methods and how to read the OSHA standards. Participants will receive a completion card from the U.S. Department of Labor OSHA certifying successful completion of this OSHA 10-Hour course. 29 CFR 1926 CFR Book & course material furnished.

Topics Covered:

- Introduction to OSHA
- Electrical Hazards
- Fall Protection
- Caught-In and Struck-by Hazards
- Personal Protective Equipment
- Health Hazards in Construction

Who Should Attend:

This basic safety course is recommended for workers and supervisors, or those who have been given the task of developing and managing their employer's safety program.

A Certificate of Attendance will be provided to attendees.

If you hire Contractors: Many cities also require their contractors to maintain a safety program to be eligible to work for them. The OSHA 10-Hour course will help those owners, managers, and employees develop a solid safety foundation at their company to hopefully avoid incidents while working for the city or utility. Hiring a contractor to perform work for the city/utility does not eliminate all liabilities to the city.

When and Where:

Wednesday, January 23
Registration: 8:00 - 8:30 a.m.
Course: 8:30 - 4:30 p.m.

Thursday, January 24
