

## Lamoni Municipal Utilities

### Job Opening: Water Plant & Wastewater Plant Operator/Technician Grade 1-2

Perform duties required relating to water production at the Water/Wastewater Plant, including maintenance and repair of building, grounds, filtration, and feed equipment, pumps and motors, and water towers. Performs associated testing, monitoring, and recording required by local, state, and federal law. Performs skilled and routine tasks involving customer services in adjusting and installing water taps, meters and other types of customer services.

- Operates and controls electric motors, pumps, and valves to regulate flow of raw water into treating plant.
- Tests water samples.
- Records and monitors data.
- Performs inspection of water towers and associated booster pumps and controls.
- Inspects and assists in water main installations, installation and removal of water meters, location of water leaks and valves; makes water taps; operates water valves and curb stops; and uses pipe location and leak detector.
- Locates underground water utilities.
- Operates and maintains vehicles and equipment.
- Maintains and flushes fire hydrants.
- May read meters.
- May provide mutual aid with other utilities in emergency situations.
- May assist in training new employees when needed.

The successful candidate, upon job offer, must pass a drug screen and will be included in random drug testing program. Starting wage is commensurate with experience. This is a full-time position includes a generous benefit package. Send resume and/or application to: Lamoni Municipal Utilities, 111 S. Chestnut Street, Lamoni, IA 50140.
