

SPD LEVEL 1 INTENSIVE

STAR Institute offers experienced clinicians the unique opportunity to learn from first generation faculty chosen and trained by Dr. Lucy Jane Miller, PhD of the STAR Institute and its premier SPD Treatment Center. Working in a group setting (15-25), participants of STAR Institute's Off-site Intensive Level I learn to apply **clinical reasoning** through lectures, video treatment observation and analysis with experienced STAR faculty.

Benefits include:

- Observe children in videotaped 1:1 therapy with experienced STAR Institute Treatment Center therapists using combined occupational therapy (OT) and listening therapy (LT).
- Receive group processing/supervision guided by faculty level clinicians from the STAR Institute.
- Learn about the newest assessment tools for the SPD population.
- Opportunity for small group discussions.
- Networking with other experienced clinicians
- Resource materials for use in your own practice.
- Competency credentials and approximately 25.5 Contact Hours (2.55 AOTA CEUs)
- First step in SPD Proficiency Certification

Topics covered:

- Definitions of SPD subtypes
- Differential diagnosis of SPD subtypes
- Use of standardized scales, clinical observation, and published parent/teacher report measures in assessment
- Clinical reasoning tools for treatment planning
- Application and components of the STAR Model of Intervention
- A SECRET problem-solving method for clinicians, parents and teachers

Who should attend:

This intensive program is designed for therapists to enhance diagnostic and clinical reasoning skills. Successful completion of an Intensive Level 1 program is required to obtain SPD Pro Certification I, and apply for a Level 2 Mentorship.

July 26-29, 2018
Advanced Therapy Solutions
Spartanburg, SC
