
Flood Control Project Manager

Job Description

GCW, Inc. is a Professional Engineering Surveying Consulting firm that has been in Las Vegas since 1969. We have a long-standing reputation for exceptional client service in delivery of high quality products and service in a timely and efficient manner. GCW offers a comprehensive benefit package including paid medical, dental, life and disability insurances, competitive salaries, and generous retirement plans.

We are seeking a NV PE for our Las Vegas Flood Control team. We are looking for someone with a BSCE, NV PE (or ability to obtain within 6 months after hire) and 5 – 10 years experience. Good working knowledge of AutoCAD Civil 3D, hydrologic and hydraulic software, and Microsoft programs. Knowledge of GIS is a plus. Someone with the ability to communicate clearly and concisely in written and oral communications, must be able to read and comprehend detailed correspondence and reports. Duties would include (but not limited to):

- Preparing and supervising the preparation of technical drainage studies suitable for agency review.
- Participate and develop agency and client relations.
- Provide planning and engineering expertise in area of specialization to external development groups and internal design groups.
- Assist in preparation of proposals and statements of qualifications.

Interested applicants with all of the above qualifications are encouraged to upload your resume online at www.gcwengineering.com.

Job Type: Full-time

Qualification Questions:

- How many years of Project Management experience do you have?
- Do you have the following license or certification: NV PE?
