

Telehealth for Providers

Productive Providers, Happier Patients, Lower Costs

Key Features & Benefits:

PROVIDERS:

- No cost, no commitment for first 60 days
- No long-term contract
- Simple per provider per month fee structure
- Quick registration and training
- Reimbursable
- HIPAA-compliant
- Serves any specialty
- Increase billable patient encounters
- Reduces chance for spread of viruses or infection
- Reduces no-shows
- Maintain patient volumes during COVID-19

PATIENTS:

- Convenient virtual visit via smartphone or other device
- No cost or low-cost visits (depending on insurance)
- Limit exposure to sick patients in healthcare facilities
- Maintain safe, social distance
- Protect others if symptoms present
- Use for primary and specialty care

Overview

The Sharecare Telehealth solution is an easy-to-use, secure video chat and patient texting platform that allows you to meet patients where they are – on their phone. With no apps or downloads necessary, this HIPAA-compliant service connects providers and patients instantly through both web and mobile-based communication capability.

Why Telehealth?

COVID-19 has upended the traditional provider delivery model with many patients canceling appointments and putting off much needed care. Sharecare meets this increasing demand for remote provider and patient connection through simple solutions that allow you and your staff to do what you do best – care for people. Sharecare can instantly enable healthcare providers, practices, and health systems of all sizes to conduct online patient visits, provide screenings, triage, and address patients' urgent healthcare needs. And it's never been easier.

Video Chat

Sharecare's web-based video chat feature allows patients and care team members to connect face-to-face through a HIPAA-compliant platform that requires no expensive equipment or complex training. This easy-to-use solution is accessible anywhere with internet and provides for the safe, effective, convenient treatment your patients expect. Have your practice trained and up and running in less than 24 hours.

Secure Text

Sharecare's secure text feature reduces your practice's wasted time playing phone tag. Communicate with patients the way they want to be reached through HIPAA-compliant SMS text, even allowing forms, pictures and videos to be attached. Reduce patient no-shows, be more efficient, and stay in compliance with secure text.
