

A great solution for training needs!

MPUA's E-Learning Network has hundreds of online courses available that cover a wide variety of topics to meet the training needs of an on-the-go, multi-tasking utility workforce.

There are no subscription fees or contracts to sign in order to access the network. It is a pay-as-you-view system that can be delivered in both a group setting or in an individual learner setting. The choice is up to you.

The best part is that it has management and administrative tools built-in at no additional charge. This is all available for a very affordable price.

“

I am currently mentoring three supervisory persons who have not been formally trained in management but have worked up through the system. I was looking for a way to introduce new supervisors to various management topics. The online E-Learning program fit my training plan perfectly.

E-LEARNING NETWORK

Efficient...

Management tools

MPUA's E-Learning System is an effective tool to manage your training efforts and put you in control of your training dollars by allowing administrators to:

- Define the coursework needed by employees
- Pre-clear employees for participation in selected courses
- Review individual performance and test scores
- Track employee progress toward training goals

"I like the program for several reasons; it is easy to use, very affordable and flexible for any time schedule. It is great for introductory training and refresher training alike."

*-Doug Colvin, Public Works Director
City of Nixa, MO*

Effortless...

Training on your own terms

Employees simply log on from work or home to access the courses at a time that suits their schedules. They can even take a course in increments, if time is limited. Fitting MPUA's E-Learning Network into your schedule is easy and effective.

Accredited...

Training programs

Many of the courses can be used as the foundation for satisfying training renewal. Classes are available to meet the requirements for Missouri DNR's operator certification renewal for water, wastewater and drinking water. Our programs are also recognized for OSHA's HAZWOPER 8-hour refresher training requirements and for DOT's operator qualification rule.

Results...

Successful, productive staff

An investment in training is an investment in your city's future. Reap the results of organized, ongoing training with MPUA's E-Learning Network. Your employees will maintain and improve their skills. Their motivation and productivity will increase because of your investment in them.

Affordable...

Saves time and money

Online training saves time and money because there is no off-site training. Classes are a fraction of the cost of on-site training. In today's fast-paced, cost-conscious environment, MPUA's E-Learning Network is economical.

"E-Learning is an easy way to increase your knowledge at a very reasonable price. I liked the convenience of being able to study and take the courses at my own pace and schedule. The cost is very reasonable and the courses provided the instruction I was looking for."

*-Bobby Gerlt
Power Plant Superintendent
City of Fayette, MO*
