Columbia

**Register**

before June 26

send your utility name, email,  
attendee names and titles to:

**training@mpua.org**

**573-445-3279**

The Reliable Public Power Provider (RP3) certification is increasingly relied upon by bond issuers, insurance companies, and industrial research firms as a mark of high quality.

Our expert panel will guide you through the application process, where to get data and provide insights on how to receive the highest score. Each panelist has earned a high-level RP3 recognition with two previously serving on the RP3 Review Panel. Trainers:

\***Brent McKinney**, City Utilities of Springfield \***Jared Stewart**, Hannibal Board of Public Works

\***Cassandra Ludwig**, Carthage Water and Electric Plant

If COVID-19 restrictions make in-person training not feasible, we will switch this to a virtual workshop and notify all registrants.
