

Drury Plaza Hotel Columbia East - 3100 Interstate 70 Drive SE, Columbia, MO

JAN. 17, 2019

10:00AM TO 3:00PM

MPWC PRE-TREATMENT WORKSHOP

Join us for an interactive training event

We are excited to offer a Pretreatment Workshop happening on January 17, 2019 in Columbia, Mo. Speakers and Pretreatment program experts include Kim Cole, KimHEC and Nick Muenks, Geosyntec. The afternoon will consist of an interactive session where we want you to bring your pretreatment program materials and issues to the table. During the interactive session we will discuss what types of best practices should be incorporated in your program and hear from other communities on their lessons learned from navigating through State and Federal requirements. Finally, Todd Blanc and Logan Cole, MDNR will attend the last hour of the day for a question and answer session. This workshop is a time to get real answers for your current pretreatment program issues.

Round-table Discussion

Interactive Work Session

Bring your permits, local limits, ordinances, and lab data to get answers from the experts

Network with other cities with pretreatment programs

Lunch will be provided by Geosyntec and KimHEC
