

compostable bags

INDUSTRIAL SIZES

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. **Not suitable for backyard composting.** CERT # 829147

AL-PACK is pleased to introduce our next generation of compostable bags. These bags are made from our own blend of compost film that is manufactured on our new 3 layer extrusion line. This new line was designed specifically for compost film.

- The new film is stronger and has lower slip properties. The bags will stand up better in their containers.
- Semi-Transparent so haulers can spot contamination.
- Made from materials that meet the ASTM D6400 standard and are certified by BPI and BNQ.
- Individually printed with the BPI and BNQ logos for easy identification.
- The bags have a high vapor permeability that reduces the chance of mold and makes them ideal for holding organics that may be hot or have high liquid contents.
- Bags convert to Carbon Dioxide and water within weeks of disposal in a compost facility.

Item	Size (inches)	Qty. Case	Gallon/ Liter	Weight	Qty. Case	Skid
P-BRGB1716COMP	17 x 16	125	2.6G • 9.8L	2.1	125	330
