

2021 Geothermal Rising Conference Sessions:

- Closed Loop Geothermal Goes Mainstream: Providing New Opportunities for Growth
- Cost-Effective and Durable Materials for Next Generation Geothermal Wells
- Country Updates
- Decarbonizing Existing Oil and Gas Field via EGS and Direct Use
- Development Stories of Geothermal in Kenya
- District Heating & Direct Use: Feasibility to Implementation
- Drilling: Past, Present and Future
- EGS - from Theory to Operations
- EGS Collab: Experimentation, Modeling & Interpretation
- Existing Plant Energy Recovery: Opportunities, Benefits and Challenges
- Financing Geothermal Projects - Risk Mitigation Schemes
- FORGE Activities, Progress & Plans
- Geochemistry of the Wide Range of Geothermal Systems from Deep Circulation to Vapor Core Systems
- Geomechanics in Geothermal Reservoir Development
- Geophysics in Geothermal Exploration and Monitoring
- Geothermal Electricity Production Projects in South America
- Geothermal Energy in Canada: A Hot Conversation
- Geothermal Heat Pumps: Latest Tech & Market Development
- Geothermal Hybrids
- Geothermal Production Decline Curve Analysis from Long-Term Pump Performance
- Geothermal Subsurface Petrophysics and Interpretation
- Harnessing Energy and Water in the Salton Sea
- Integrated Geothermal Reservoir Simulation
- Machine Learning in Geothermal Development
- Mineral Extraction from Geothermal Fluids
- Modern Seismic Methods for Exploration & Resource Assessment
- Monitoring Geothermal Systems
- Overcoming Non-Technical Hurdles in Geothermal Development
- Prevention and Mitigation of Scaling and Corrosion Using Modeling, Monitoring, Materials Selection and Chemical Treatment
- Rebranding Geothermal: Geothermal Education & Community Engagement
- Regional Updates
- Sedimentary Basins
- Stimulation Technologies for Geothermal Energy Development
- Super Hot Rock (SHR) Geothermal Development
- Technology Transfer to Geothermal from Oil & Gas and Other Subsurface Disciplines
- Unlocking Geothermal Technology Innovation through Advanced Manufacturing
- Validating Integrated Geoscience Interpretations Using Modeling and Well Data
- Other (Please Specify)
