

MSC Committee ESP Leadership Development Program

Committee's scope and research interests

The Mesenchymal Stromal Cell Committee strives to:

- Assist in the planning of the Annual Meeting scientific program and the review of submitted abstracts in the non-hematopoietic stem cell field
- Review the status of the MSC field and compile position papers on the relevant scientific issues that must be addressed to advance or enable cellular therapies utilizing MSCs
- Foster international discussion about controversies in the MSC field and method/nomenclature standardization
- Offer educational opportunities to Early Stage Professionals (ESP) in the MSC field

Projects and responsibilities for the ESP member

Potential projects for the ESP member are as follows:

- The ESP member could be sent to a meeting and write a report on the meeting proceedings
- The ESP member could assist in the support of possible survey programs
- The ESP member could contribute to publications in the Telegraft
- The ESP member could assist with contributions to public submissions on standards documents

ESP member's opportunities within the Committee

Contributing to the committee's deliverables along with the opportunity to work with experienced members in relation to their sphere of interest
