

# Ron Lawler

## **1. What makes our mission meaningful to you?**

The future of EMS requires highly educated providers. Advocating for meaningful education standards and involvement of educators at all levels of EMS decision making is essential in ensuring that policy is made with the effects on education in mind.

## **2. What skills, resources, & expertise can you offer & are willing to use on behalf of NAEMSE?**

I have served before and am willing to bring the time and talents that I shared before. I am in an interesting position. My daily work involves both initial education for EMTs and paramedics, as well as continuing education for an active urban ambulance service. Our paramedic program is a consortium between our ambulance service and the local community college. And all of this takes place in an area that includes small urban areas surrounded by thousands of square miles of frontier. This experience brings a lot of different viewpoints to the board.

## **3. As a member of NAEMSE how have you contributed to the growth of the association?**

I encourage all of the educators I run across to join the association. My department used to teach a state level DOT instructor course, but now sends all comers to the NAEMSE Courses.

## **4. Please list any leadership / committee positions that you have held in NAEMSE.**

I have been on the Research and Ed Tech committees for years. I served one term on the Board from 2019-2022. I am currently a representative to several NREMT committees (AEMT standards, Diversity in EMS, Continuing Education) and was the NAEMSE rep to the latest American College of Surgeons Field Triage Guidelines update.

## **5. Please list other leadership positions you have held during your professional career.**

I have been asked to hold numerous leadership positions. I am currently the Director of Learning and Development for Sanford Ambulance. In addition, the hospital based simulation team and emergency response training teams have been added to my portfolio. I have served as Vice Chair of the MN EMS Education Workgroup and Chair of the ND Community Paramedic Advisory Committee. I also serve as the department chair and program coordinator for EMS programs at our affiliated college. As a volunteer, I serve as a site visitor team captain for CoAEMSP.

**6. Please include a 150-word biographical statement that will give insight to your leadership skills**

My life journey has been extremely varied including as an officer in the military, big box retail department manager, and even a lead at a furniture manufacturer. I found my love for EMS in the 1990s. Since then, I have been elected, appointed, or volunteered for several leadership positions from local to state to national areas. On the state level, I chaired committees adding community paramedic rules, piloting an EMT portfolio program, and converting to a "straight Registry state." My latest accomplishment, and one of my favorites, was representing NAEMSE to the American College of Surgeons as they updated the Field Triage Guidelines. Being one of a handful of EMS providers in a roomful of surgeons was challenging and took the ability to speak up and provide "real world" ground ambulance experience to the doctors. I would love to bring this same kind of consensus building to the NAEMSE Board.

**7. How long have you been an active member of NAEMSE?**

Hmm, 14-15 years or so?

## **Ron R. Lawler, BUS, NRP**

---

### **Education**

Bachelor of University Studies – Paramedic emphasis  
2011 North Dakota State University Fargo, ND

Associate of Applied Science – Paramedic Technologies  
2002 F-M Ambulance/Bismarck State College Fargo, ND  
Dean's List all semesters - Program Student of the Year

### **Experience**
