Symposium Spotlight! Cultural Competency 101

The cultural competence committee has made great strides over the last 18 months. One of the committee's first goals was to put on a cultural competence workshop for EMS Educators. With the support of the NAEMSE Board of Directors, a cultural competence workshop will be presented at the upcoming NAEMSE conference. We would like to personally invite you to attend this ground breaking event. Please join us for a morning of stimulating activities and meaningful discussions. The educational tools and content in the workshop are meant not only to inform and provide an insightful experience, but also to be "borrowed" and utilized in the classroom. – *Cultural Competency Committee*

The objectives of the workshop are:

- Define key terms within the cultural competency framework (cultural competence, cultural humility, diversity).
- Illustrate through example the negative and positive impacts of cultural competency in primary and continuing education.
- Present practical tools to educators for use in educational settings to promote cultural competency in prehospital education.

Take a quick glance at the Cultural Competency 101 Subcommittee's Pre-Conference Session, *Cultural Competency 101*, in our 2018 Symposium Program Guide.
