Nation's Leading Window Energy-Efficiency Experts Meet to Highlight Latest Innovations

GREENBELT, MD, Jan. 25, 2021 – [The National Fenestration Rating Council](#) (NFRC) will hold its 2021 Spring Committee Virtual Meeting from March 29 to 31 with updates on the latest technology and innovations in windows, doors, and skylights. The online event will bring together leaders in the fenestration industry ranging from manufacturers and labs to architects and green building professionals.

At the three-day event, attendees will discuss industry advancements, updates to NFRC's programs and processes, and review improvements in fenestration that affect the comfort and energy use in homes and offices nationwide. NFRC is the nation's leading authority on energy-performance ratings for fenestration products including windows, doors, and skylights.

"Throughout the year, our meetings will focus on the new technologies that will shape the future of the fenestration industry. We have leaders from several National Labs and researchers at top universities speaking about next generation Smart windows and dynamic glass as well as advancements in energy performance and durability," said NFRC CEO Deb Callahan. "Increasingly, members say that they are looking to energy efficiency as a way of reducing carbon emissions while improving profitability and competitiveness. Even during this ongoing pandemic, businesses rely on NFRC to outline ways to work together to build a sustainable future."

Early bird registration is open now for NFRC members at \$125 and nonmembers at \$200. Register today as meeting fees increase on Feb. 8 to \$175 for members and \$250 for nonmembers. Join us at NFRC's Spring Committee Virtual Meeting March 29-31, 2021 for valuable information on ways to build a sustainable future in tough economic times. [Click here](#) to register now! For more information or questions about the meeting, email meetings@nfr.org.

###

About National Fenestration Rating Council

NFRC is a nonprofit organization that administers a voluntary, uniform rating, labeling, and certification system for the energy performance of windows, doors, curtain walls, skylights, and other fenestration products. Its members include manufacturers, suppliers, utilities, consumer groups, representatives from the building and code industries, scientific and educational organizations, and government agencies. To learn more about NFRC's efforts to improve the energy efficiency of windows, doors, and skylights, please visit www.nfrc.org.
