Join NORA in New Orleans for the 2009 Winter Meeting at the Ritz Carlton, New Orleans, February 4-6, 2009.

A registration form with tentative timeline is included with this newsletter. Hotel rooms will be available during the NORA meeting for the discounted rate of $189/night. To reserve a room, call 800-241-3333 by January 13, 2009. Call today as rooms may sell out.

NORA’s Winter Meeting attracts 100+ leaders from the liquid recycling industry for networking and to address regulatory & business issues facing members.

Situated at the confluence of the mighty Mississippi River and the picturesque Gulf of Mexico, New Orleans, Louisiana is often referred to as the most unique city in America. Due in part to its prominent annual events such as Mardi Gras and Jazz Fest, New Orleans is continually ranked among the world’s most popular tourist destinations.

The Big Easy, as New Orleans is known, was originally a French colony in the early 1700’s. The Spanish took control from 1769 to 1800 when Spain transferred Louisiana back to France. In 1803, U.S. President Thomas Jefferson adroitly bought the territory from France for $15 million when the territory was sold to the United States by Napoleon as part of the Louisiana Purchase. The city’s ever-present celebratory spirit is evident in the French Quarter, embodied by those who live there and can be found in every neighborhood throughout the city.

The Ritz-Carlton, New Orleans hotel welcomes visitors with genuine Southern hospitality and singular flair. From its premier location on the edge of the French Quarter, the hotel’s location provides guests easy access to most of the city’s popular and unique attractions. The hotel features a newly-renovated 25,000 square-foot destination spa with twenty-two treatment rooms and Spa Café, a new signature restaurant, two lounges, 35,000 square feet of meeting space and it is in close proximity to numerous antique stores, art galleries and restaurants.

---

Conference Presentations Available Exclusively To Members

NORA has just uploaded all the presentations from the 2008 NORA Conference. Members have exclusive access to download them. Visit noranews.org and go to the Resource Center. If you need a username and password, email nora@noranews.org.
Companies in **bold** have an ad in this newsletter. Companies in **RED** have a Booth at the 2009 NORA Annual Conference.

**Accurate Energy**
302-947-9560
paul@accurate-energy.com

**Actaris**
864-377-3395
jeff.kiser@actaris.itron.com
Manufacturer of mass flow liquid measurement systems with Net Oil capabilities for the waste oil collection industry.

**Advantage Route Systems**
209-632-1122
dkroutil@advantagers.com
Advantage Route Systems is a global supplier of route accounting software using sophisticated, affordable handheld computers to collect data on route. Used by several companies in the waste oil recycling business, it has a proven ROI. Visit our Web site!

**AMSPEC**
713-330-1000
nebocoltd@aol.com
Est. 1986; an industry leader providing inspection and lab services in accordance with API and ASTM standards; U.S. Customs / IFIA approved. Located throughout the N.E., US Gulf and West Coasts, with global affiliates to service our International clients alike.

**Bedford Industries, Inc**
800-848-8228
vid@bedfordindustries.com
Manufacture a full line of oil filter crushers, drum crushers, and oil filter balers. On the market since 1989, the OBERG filter Crusher has stood the test of time.

**Blend Tech, Inc**
888-869-4827
kughn@aol.com
Antifreeze inhibitor sales, chemical sales, technical support, laboratory testing and analysis. Seminar Training for Fluids, including antifreeze, oils, fuels, and hydraulic. Antifreeze recycling consulting.

**Build-All Corporation**
800-558-2148
rberg@build-all.com
Manufacturer of parts washers & degreasing equipment.

**Castion Corporation**
800-628-7528
ddelasanta@castion.com

**Chemical Engineering Partners**
949-757-7555
markw@evergreenoil.com
Chemical Engineering Partners (CEP) provides used oil re-refining technology to clients worldwide. Our re-refining technology was developed at Evergreen Oil’s re-refinery. CEP is the exclusive licensor of this proven, state-of-the-art technology.

**Chem-Tainer Industries**
631-661-8300
tlamb@chemtainer.com

**DesertMicro**
904-247-4285
barryg@desertmicro.net
DesertMicro provides management software for oil waste, recovery and recycled industry. Petrol-Manager provides detailed history, extensive billing options, container tracking, lab results, profiling, routing and dispatching.

**Dexsil Corporation**
203-288-3509
jmahon@dexsil.com
Dexsil’s newest product, Clor-D-Tect 1000 and Q-4000 detects chlorine contamination in used oil, and HydroClorQ detects organic Chlorine in wastewater. HydroSCOUT advantage over time consuming and costly laboratory methods. It provides detailed history, extensive billing options, container tracking, lab results, profiling, routing and dispatching.

**Dober**
630-410-7335
tweisner@dobergroup.com
Full service chemical manufacturer specializing in antifreeze additives, oil treatment, wastewater treatment, boiler water treatment, and cooling water treatment.

**Dragon Products**
228-596-0361
gerry.gordon@modernusa.com
Manufacturer of Vacuum Trucks and Trailers, code and non-code, roll off hoists and trailers, roll off boxes and de-watering boxes, Froc Tanks, dump trailers and centrifugal pumps.

**Emulsions Control Inc**
619-656-8899
eci-info@emulsiononline.com
Demulsifiers for waste oil, clarifiers for oily wastewater, polymers, consulting/training services.

**EnergyLogic**
615-251-0680
rstevens@energylogic.com

**Environmental Re-source Associates**
508-428-6282
eragortze@comcast.net

**GEA Westfalia Separator, Inc**
201-767-3900
jtm1@wsus.com
Centrifuges-Disc type and decanters for the purification of used oil and/or wastewater. Biodiesel-separator and decanters used in Biodiesel Process.
General Combustion Corp  
407-290-6000  
mhoward@gencor.com  
Manufacturer of the HY-WAY brand thermal fluid heaters. Piping, pumps, tanks, & burners for processing industries, terminals & recycled oil. As well as other products.

Hill Manufacturing Co.  
864-616-6849  
paghill1@yahoo.com  
Manufacturer of de-emulsifiers, water treatment chemicals, flocculants, lubricants, solvents, degreasers.

Insurance Office of America Inc  
800-243-6899  
rod.morton@ioausa.com  
Member insurance program for NORA. Company representing-XL insurance, AIG, Zurich, Chubb&Sons, Crum & Forster, American Safety, and many other companies.

Kleentec Inc  
800-435-5336  
ajrockx@yahoo.com  
Parts washers, spray cabinets, agitation units, ultrasonic, transmission service center, Solvent+Aqueous recyclers, shop towels, spill kits, bio-remediating, parts washers cleaners+chemicals, paint gun cleaners+solvent stills.

LABCAL SERVICES INC. dba LCS  
281-474-1334  
j scholes@lcs-llc.com  
LabCal Services is a full-service, independent, analytical laboratory specializing in petroleum, petrochemical, environmental, water, soil, and bi fuels. We offer a complete battery of standard test methods, from gravities to the most complex methods.

Oil Recycling Technologies, Inc  
317-523-2321  
jreed@oilrecyclingtech.com  
Oilmen's Truck Tanks Inc.  
864-573-7400  
johnfaris@oilmens.com  
Truck mounted tanks and trailers for waste oil recovery. All major brands of trucks available. Equipment for transportation and bulk storage sites. Certified R Stama facility for wreck repair and remounts.

Partherm Corp.  
610-941-4900  
jseybold@paratherm.com  

Par-Kan Company  
260-352-2141  
tsheets@par-kan.com  
Par-Kan offers Leakproof Steel Containers for storage of disposable oils and filters. Containers are available in various sizes with poly lids, fork pockets and caster frames.

PESCO-BEAM Environmental  
540-206-2788  
luke@pescobeam.com  
Over 15 years in the used oil recovery field-Custom designed and manufactured-turnkey, skid mounted, affordable systems-including both clay filtration and hydrotreating options. Individually engineered to meet your specific production goals.

Poracky and Associates, Inc.  
815-929-9440  
Jporacky@Poracky.net  
Licensed Hazardous Waste and Non Hazardous, Special Waste Hauler. Drum and Box disposal, Vac Trucks, Used Oil marketing, Environmental Construction Management, Building demolition, UST/AST Services, and Full Service Environmental Consultant.

Process Resource Group, Inc  
816-718-7130  
goodideas@prgorion.com  
PRG provides consulting services to the Oil Recovery industry. It has developed and markets the Onion Truck Ticketing system. PRG can provide a complete installation to make Oil Recovery companies more efficient and profitable.

Quest Recycling Services, LLC  
214-914-7369  
briand@questrecycling.com  

R&D/Fountain Industries  
507-373-2351  
kjkieter@msn.com  
Industrial equipment for parts cleaning.

RAY Camp Filters-Strainers  
404-766-4940  
john@raycamp.com  

Repsol-YPF-Applied Technology Center  
54-221-4298665
Shel Lubricants
713-546-4209
brett.morton@shell.com
Manufactures, markets, and distributes new lubricant products. Works with NORA member companies to arrange recycling of mixed and used lubricants from company-owned and customer locations.

Spencer Machine & Tool
812-282-6300
glenespencer@aol.com
Filtration.

Summit Environmental Technologies
615-794-9437
lpachecoset@aol.com
Full service QAQC environmental laboratory. Emphasis and experience with liquid recycling and environmental service industries. Nelac and AZLA ISO certifications.

SystemOne Technologies Inc.
305-593-8015
mansurp@systemonetechologies.com
The Industry’s most powerful parts cleaning technology. Over 50,000 units installed in 30,000 locations worldwide. Unique advantages: cut costs by 60%; pure solvent “On-Demand” daily; recovers 100% pure solvent; eliminates 100% of hazardous solvent waste.

Trihydro Corporation
307-745-7474
gmathes@trihydro.com
Trihydro offers environmental, civil, and infrastructure engineering; providing due diligence, compliance (SPCC, greenhouse gas, sustainability), and remediation services to the used oil industry nationwide.

Tri-State Tank, L.L.C.
800-255-0008
wterpstra@tstllc.com
Builders of truck mounted tanks for liquid recycling industry. Tanks, trucks, and pumps in stock for immediate delivery.

Truck Works Inc.
602-233-3713
maddux@truckworksinc.com
OEM manufacturer of bulk liquids and transportation equipment. Truck tanks steel, aluminum, and stainless. MC 406/407/412 code and non-code tanks. 1500 gallon to 4500 gallon capacities. New and used units available. Parts in stock.

UNI-ROM Corporation
905-447-5911
davidwillaim58@aol.com
Uncleaned. 100% used oil recovery. Pure solvent "On-Demand" daily. MC406/407/412. 1500 gallon to 4500 gallon capacities. New and used units available. Parts in stock.

Vertex Energy, L.P.
866-660-8156
benc@vertexenergy.com
Buyer and logistical manager of petroleum products.

Vertex Residual Management (VRM)
281-486-4182
koryw@vrmus.com
Demulsifiers for waste oil treatment, wastewater treatment chemicals, metal precipitants, industrial cleaners, antifreeze recycling chemicals, antifreeze additive packages, and consulting.

Weatherford/MCC, Inc
812-858-3147
bryan.gray@weatherford.com
Demulsifiers for waste oil treatment, wastewater treatment chemicals, metal precipitants, industrial cleaners, antifreeze recycling chemicals, antifreeze additive packages, and consulting.

Werts Welding & Tank Service
618-254-6967
manderson@wertswelding.com
Demulsifiers for waste oil treatment, wastewater treatment chemicals, metal precipitants, industrial cleaners, antifreeze recycling chemicals, antifreeze additive packages, and consulting.

XL Insurance
800-327-1414
kathleen.mcginn@xlgroup.com
The environmental division of the XL Insurance companies offers integrated environmental risk management solutions through insurance, loss control and claims management to leading businesses.
A major portion of this newsletter is geared at reflecting on the 2008 NORA Conference. It was a tremendous success for the attendees and the exhibitors.

As with the rest of the country, there was a vibe of uncertainty looking ahead to 2009. Here are the questions that members were pondering at the 2008 conference:

1. What are the best used oil acquisition pricing strategies given the highly volatile energy market?
2. Will the new Obama administration initiate dramatic environmental regulatory changes effecting liquid recyclers?
3. How much impact will a slowing economy have on the volume of used oil?

About the only thing that is certain in 2009 is that used oil will be generated in 2009 and NORA will celebrate its 25th anniversary.

**NOW more than ever**

At the 2008 conference, many members spoke of their renewed commitments to keeping their business healthy in 2009. They shared their plans to refocus their efforts to work harder and smarter to protect their interests, their employees and various shareholders.

NORA has been inspired by its members and is committed to refocus its efforts to help keep the industry healthy next year and for many years to come. That is why NORA has adopted the motto for 2009: NORA NOW more than ever.

Here is some of what NORA is planning for 2009.

**Dues Same for Last 8 Years!**

How many things in business are you paying the same level in 2009 as you were in 2002? NORA is committed to efficient operations to keep fees low and adding more value to members by continuing to attract new members.

**SAVE**

Members will save even more in 2009. Non-member prices for NORA services will increase as the association strives to keep member costs down.

NORA members will continue to receive an exclusive discount on certain Dexsil products (see page 10). If you are a vendor and would like to offer NORA members a discount or value not available to non-members in exchange for promotion, please contact me at sparker@noranews.org.

**Government Affairs**

Change is clearly coming at the federal level in 2009. With a new President, new EPA administrator and Secretary of Energy, there has never been a more important time to have an industry watchdog looking out for your interests in Washington, DC.

Your membership investment supports the NORA team of myself, General Counsel Chris Harris and Senior Consultant Jack Waggener.

We are monitoring the fluid situation in DC for members and will take all necessary actions at the direction of NORA's committees, Board of Directors and Executive Committee.

By standing together, NORA can continue to work with federal and state officials and legislators to develop sound environmental guidelines that support a healthy liquid recycling industry. NORA is also prepared to strengthen partnerships with groups such as the Recycling Roundtable, ILMA, AOCA, NAPA, FMC and others. Together, we’ll continue to demonstrate NORA members’ dedication to protecting the environment.

**Knowledge**

Through our events, website, and publications, NORA is committed to helping bring 2009 into focus. For example, see the articles on page 12 and 14.

...continued on the next page
Looking Ahead to 2009

...continued from the previous page

Networking
A key benefit of membership is the “power of the NORA network.” In 2009, NORA will host three events in New Orleans, Denver and Miami. Hundreds of members will gather and explore business opportunities as well seek solutions.

NORA will also continue to produce our popular membership directory and provide improved tools for accessing member listings on the NORA website.

Celebrating 25 Years
NORA was founded in 1984 to ensure that used oil was not categorized as a hazardous waste by EPA. The association was successful and has gone on to help build a responsible regulatory frame work for its members.

In conjunction with the NORA anniversary, a special project pending approval will be announced in the next few months that will create a radical public relations campaign to promote the industry and members.

2009 will bring change
It is our job to do our best to define the change that we can and to understand and adapt to the change that we cannot affect.

In 2009, NORA will produce three educational events and nine publications for members and change will be a theme throughout all of these productions.

Thank you for your continued support of your industry association.

Integrated Insurance Programs
for the Recycling Industry

For more than 20 years, the environmental unit of the XL Insurance companies has been providing integrated insurance solutions that include:
— Property & Casualty coverage
— Pollution coverage, tailored for customers’ needs
— Specialized Risk Control and Claims Management services

You also benefit from our financial strength and stability. The XL Insurance companies have one or more of the following ratings:
A+ by A.M. Best
A+ by Standard & Poor’s
Aa3 by Moody’s

For more information, please contact:
Matt Gartner
Assistant Vice President – Underwriting
XL Insurance
520 Eagleview Blvd
Exton, PA 19341
Phone: +1 800-327-1414 ext 9294
Email: Matthew.Gartner@xlgroup.com

“XL Insurance” is a registered trademark of XL Capital Ltd. XL Insurance is the global brand used by member insurers of the XL Capital Ltd group of companies. Coverages are underwritten in the US by Greenwich Insurance Company, Indian Harbor Insurance Company, and XL Specialty Insurance Company, and in Canada by XL Insurance Company Limited – Canadian Branch.

The above policy descriptions do not include a complete list of all terms, conditions and exclusions, and only the provisions of a specific policy have legal effect. Certain terms used in the above description are defined in the policy. Please see the specific policy for a complete description of its scope and limitations of coverage.
Thank You to the 2008 NORA Conference Sponsors
Everything’s More Fun in a Jeep: Thanks to sponsor Vertex, a fleet of vintage red jeeps transported NORA members to the middle of the San Andreas fault. Several attendees saw shooting stars on a truly unique desert adventure.

Wrangler: Vertex’s Bailey Kirk demonstrates how to lasso a calf made of straw. All NORA members at the closing party were taught the basic fundamentals of surviving on the open range... just in case.

Flashback to 1849: In case the whole used oil recycling thing doesn’t work out, NORA members were shown how to pan for real fake gold.
2008 Wild West Closing Party Sponsors
Holston Environmental Services Inc.
R&D/Fountain Industries

Come and Get It: Members were treated to an amazing buffet and open bar thanks to our generous sponsors.

Corn Holin’: Dave Brown (r) of United Solutions takes his turn at the “corn hole board” as Steve Aracker (l) of Safety-Kleen waits. United Solutions brought custom NORA “corn hole boards” to the meeting from Ohio and auctioned them off as a NORA fundraiser.

Anybody Know a Good Ghost Story? The weather for the closing party was perfect for a campfire. Later in the evening, smores were served.
NORA & Dexsil Continue Partnership to Offer Big Discount To Members

NORA is proud to announce that it is continuing its long-standing partnership with Dexsil Corporation to offer a 10% Discount on their Clor-D-Tect products.

Scott D. Parker, NORA Executive Directory, stated, “We are very happy to continue this great partnership with Dexsil. For many of our members, the Dexsil discount more than pays for their NORA membership.”

Nearly all NORA members use the Dexsil test kits and this discount is available exclusively to NORA members.

The information below has been provided by Dexsil related to the details of this program.

**NORA DISCOUNT REQUIREMENTS**

Dear NORA Member:

Dexsil is pleased to continue its 10% discount on Clor-D-Tect products to NORA members. This is the eighth year Dexsil has offered this discount and we at Dexsil enjoy the opportunity to be a part of the NORA family.

1. All NORA members will receive a 10% discount on HydroClor Q, Percent-A-Clor, Clor-D-Tect 1000 and Clor-D-Tect Q4000.

2. In order to receive the 10% discount, the following conditions must be met:
   A. Minimum order is one case, (80 kits), for Percent-A-Clor, Clor-D-Tect 1000 and Clor-D-Tect Q4000. Companies may not combine product groups to obtain their one case minimum.
   B. Minimum order is one case, (48 kits), for HydroClor-Q.
   C. All companies requesting NORA’s discount must have an account balance that is current with Dexsil’s terms and conditions. Those companies that do not have an open account with Dexsil, payment terms will be C.O.D. or credit card until credit approval is received.
   D. Companies requesting a discount must be registered on NORA’s current membership list. This membership list and future updated lists will be made available to Dexsil by NORA for accounting purposes.
   E. To receive NORA’s discount, NORA members must notify Dexsil at the time of ordering that they are a NORA member. No discount will be given after Dexsil receives and processes the order.

If you have any questions, please contact our sales department at (203) 288-3509.

### Industry Calendar

NORA maintains relationships with related industry associations. Here is a list of their events.

**National Asphalt Pavers Association**

**Annual Meeting**

January 18 - 21, 2009, San Diego, CA

Clean in Place - Self Cleaning Filter
for the
Petroleum Industry - Refining & Recycling

Where Used:
• Oil Recycling
• Petrochemical Processing
• Trucks - DC Motor

Advantages
• Eliminate Filter Bags
• Improve Product Reliability
• Protect Downstream Equipment
• Eliminate Spillage and Resulting Waste and Environmental Liability
• Minimize Disposal and Other Environmental Costs
• Reduce Labor Costs

Features
• Constant Cleaning
• Back-flushable
• 316 Stainless Steel
• Filter as small as 10 micron or as large as customer requirements
• Flow rates to 5,000 gal/min.
• Pressures to 400psi
• Temperatures to 400°F

Spencer Machine & Tool Co.
6205 Gheens Mills Road
Jeffersonville, Indiana 47130

www.spencerstrainer.com
**Obama: Change Coming to EPA**

Create better science. Create better policies. President Elect Barack Obama plans on doing both related to the environment.

Former EPA Administrator Carol Browner has recommended returning the EPA back to its original intent including a greater reliance on science, sound regulation, fairness in enforcement and the public’s right to know. Obama has already indicated support for some of Browner’s recommendations.

And as a NORA member, you have probably just taken a deep breath. Changes to EPA policies and regulations will impact the liquid recycling industry. The question is, how?

Browner suggests that Obama directs the EPA to review how to use its existing authority to reduce green house gas (GHG) emissions and recommends that the new EPA administrator uphold the agency’s Clean Air Act authority to regulate GHGs. She also recommends that the EPA reviews and possibly re-list mercury as a hazardous air pollutant, potentially resulting in a new mercury emissions control program, as well as complete the policy to measure the lifecycle GHG impacts of the renewable fuel standard.

NORA is one step ahead. At the 2008 NORA Annual Recycling Conference and Trade Show, Jack Waggener, P.E., URS and Senior Consultant to NORA challenged members to better understand and quantify the GHG reductions as a result of liquid recycling. As a member of the Recycling Roundtable, NORA is working to do just that. The more we understand the environmental benefits of what we do, the more we can promote the benefits of liquid recycling and encourage EPA policies that support our industry.

In addition, the more NORA keeps members apprised on policy discussions, the better you can prepare your business. Whether it means making different purchasing decisions, investing in different technology, or diversifying, NORA provides the resources to support your business.

In conjunction with changes in the EPA, Browner recommends that Obama restores sufficient resources to address challenges such as climate change, energy efficiency and renewable energy sources. This includes encouraging the National Vehicle and Fuel Emissions Laboratory’s advanced vehicle technologies that would enhance vehicle fuel economy standards. Browner also suggests establishing performance standards for biofuels production so that its production does not lead to greater negative environmental impact with standards considering water, fertilizer, pesticides, and a minimum GHG reduction level.
NORA members have long anticipated changes in the supply of recyclable liquids as well as in the demand for recycled products. As our industry evolves, we must, too. NORA is the industry’s voice on Capitol Hill and will continue to promote the environmental advantages of recycled liquids within the balance of economy and environment.

Now more than ever, NORA is here to stand strong for you. As the economic environment changes, we have knowledge and resources to keep you profitable. As the political environment changes, we have strength in numbers. And we reaffirm our commitment to the environment by upholding the NORA Guiding Principles.

---

**Obama names Lisa Jackson as EPA Administrator Nominee**

EXPERIENCE: Member of President-elect Barack Obama’s energy and natural resources transition team; chief of staff, New Jersey Gov. Jon Corzine, 2008-present; commissioner, New Jersey Department of Environmental Protection, 2006-2008; assistant commissioner for land use management, New Jersey Department of Environmental Protection, 2005; assistant commissioner for compliance and enforcement, New Jersey Department of Environmental Protection, 2002-2005; U.S. Environmental Protection Agency, 16 years.

**On the appointment...**

“For anyone who cares deeply, as I do, about our nation’s environment and our citizens’ quality of life, this appointment is a dream come true. From fighting climate change globally to preventing pollution locally, we face some of the most challenging and complex environmental issues of our time.”

**On EPA’s mission...**

“EPA’s mission has never changed. Its mode of doing business has changed over the years and probably needs to change again. As an environmentalist, [there’s] no better job to have at this time right now, provided the agency is allowed to do what it’s supposed to do.”

**On the Bush era and air emissions...**

“The past eight years have demonstrated a shocking, yet consistent, irresponsibility on the part of the federal government to engage in any meaningful way . . . in implementing sustainable solutions to reduce emissions.”
Recent spikes in oil prices and increased environmental regulations have injected renewed interest into alternative base stocks such as synthetics, re-refined oil and bio-based oils, said Freedonia Group Inc. analyst Diane Wilkoff, noting a key finding in Lubricants, a new U.S. market study from a Cleveland-based market research firm.

“Synthetics are expected to continue to comprise the largest portion of these sales, but bio-based oils are expected to grow faster, due in part to governmental incentives and improved performance of these products,” Wilkoff told Lube Report.

Freedonia’s study forecasts U.S. demand for lubricants will edge up 0.8 percent per year to 2.5 billion gallons in 2012, after declining 1.8 percent per year between 2002 and 2007. Volume gains will be restricted by trends towards longer-lasting lubricants that extend oil drain intervals and reduce overall lubricant requirements, the firm’s research suggests.

Demand for engine oils, accounting for almost half of total U.S. lubricant demand in 2007, will gain a boost from an increasing number of motor vehicles in use, the study predicts, although it will be offset somewhat by trends towards smaller automobiles and less frequent oil changes.

The “do-it-for-me” engine oil change market will continue to benefit from the decline in the “do-it-yourself” market, the report anticipates, as aging baby boomers continue to change sectors. Dealerships will likely benefit the most from the switch, the study concluded, as they use oil changes as a loss leader to attract customers for more profitable repair work. Freedonia also anticipates above average oil demand from the agricultural sector and construction industry.

Growth in the manufacturing sector will fuel demand for industrial lubricants such as hydraulic fluids, process oils and greases, the report projects, forecasting growth of 0.6 percent per year to 335 million gallons in 2012.

Wilkoff said demand for greases is forecast to remain flat through 2012 at 53 million gallons. “The market will be supported by growing manufacturing activity but demand will continue to be limited by market maturity and the rise of sealed-for-life components,” she continued. “Competition from other lubricating products which are increasingly being used in place of grease will also limit demand.”

The analyst added that demand for synthetics and environmentally friendly products will grow relative to conventional petroleum-based grease. “For example, in traditional applications such as gear lubrication in the automotive sector, synthetic gear oils and high-viscosity gear oils are beginning to replace grease,” Wilkoff said. “In addition, grease is losing market share to oil in industrial settings. In many manufacturing applications, grease and oil are interchangeable. And, as manufacturers try to minimize the variety of lubricants they need on site, some OEMs are choosing oil, which can have wider applications, over grease.”

Increasing production of transportation equipment and industrial machinery will drive demand for industrial lubricants over the next five years, according to Wilkoff. “In the area of transportation equipment, motor vehicle and aircraft equipment are expected to see the largest gains as both sectors rebound from their poor performance in 2007. Lubricant demand in industrial machinery production will also be driven by strong growth for electrical power equipment, which consumes large quantities of lubricants, and increasing demand for mining and oilfield equipment.”

Member Spotlight

NORA has over 225 members. Each issue of liquid Recycling will feature a different member.

Company Name & Headquarters: Coastal Refining Corp.

When was it started: It was founded in 1980 as an answer to the ongoing oil market of the time. It was originally owned by a diverse group of four with a vision of an ongoing recycling trend. The group had previously represented the Chemical, Meatpacking and Marine industry.

NORA member since: 1988

Service areas: Coastal Refining services Georgia, South Carolina, North Carolina and the upper parts of Florida with all services related to the automotive and industrial industries.

How did you become involved with NORA? Coastal's facility was built on a virgin site with thankfully the foresight to implement with what would be industry standard SPCC qualifications.

Rick Glendye and Claude Shore, the remaining original founders continue to operate CRC today. Glendye in the mid 80s witnessed the development of approaching regulations. During a seminar with Government Institutes in Washington DC, we met some of the early organizers of what is now NORA: John Nolan, Chris Harris and Alan Gressel and others. As NORA developed, the access to information and regulatory agencies developed. Without NORA that access and input into regulatory definitions could not be accomplished on an individual basis. NORA's involvement into today's regulations is quite different than any of the proposed regulations of our industry. Membership in NORA is the best value we have ever invested in. Without it we would not be where we are today. We have been able to build a lot of positive relationships.

11 New Members Join NORA

NORA's membership has grown to over 225 members this year. NORA relies heavily on word of mouth marketing. Please refer NORA to your peers and suppliers. Eleven companies joined NORA in the past few months.

Testing Used Oil Has Never Been Easier

Clor-D-Tect® 1000
U.S. EPA Method 9077
ASTM Method D-5384

A Yes/No on-site test to determine chlorine contamination in used oil at 1000 ppm total chlorine

Clor-D-Tect® Q4000
U.S. EPA Method 9077
ASTM Method D-5384

A quantitative on-site test to determine chlorine contamination in used oil within the range of 200 - 4000 ppm total chlorine

HydroSCOUT®
Quantify Water in Used Oil

On-site or Laboratory Setting
Range: 1500 ppm - 100%
Results in 2 minutes
Environmentally safe
