Commercial Supporter Prospectus
The National Pressure Ulcer Advisory Panel (NPUAP) has the privilege of launching the 2019 International Prevention and Treatment of Pressure Ulcers/Injuries: Clinical Practice Guideline (CPG) at the Schaeffer Center for Health Policy & Economics, University of Southern California, Los Angeles on November 15-16, 2019. The CPG was developed in collaboration with our international partners: the European Pressure Ulcer Advisory Panel-EPUAP and Pan Pacific Pressure Injury Alliance-PPPIA. The CPG is a consolidation of current evidence-based clinical practice recommendations for all those involved in the prevention and treatment of pressure injuries.

The opportunity for NPUAP to host the launch of this international guideline occurs once every 15 years. We deeply appreciate the generosity of our industry supporters. We invite you to support the NPUAP Launch of this important evidence-based document. There will be additional opportunities to support world-wide dissemination of the CPG.

What makes the 2019 International Guideline unique?
• Over 1200 consumers from all corners of the world completed surveys that identified their concerns and goals for pressure injury prevention and treatment. The survey was translated into 9 different languages.
• 14 international associate organizations partnered with EPUAP, NPUAP and PPPIA in the guideline development process.
• Over 250 international experts served on small working groups to review the evidence and draft recommendations and summaries of the supporting evidence.
• Over 3500 research studies were reviewed to answer key clinical questions.
• Nearly 1000 stakeholders and consumers will provide feedback in May and June of this year on draft recommendations and references under consideration, ensuring that all relevant evidence is accurately represented in the CPG.
