NSBP/SAO Event Horizon Telescope Scholars Program

The National Society of Black Physicists (NSBP) and the Event Horizon Telescope (EHT) group at the Smithsonian Astrophysical Observatory (SAO) are sponsoring the NSBP/SAO EHT Scholars program. Summer Interns will work on projects that range across observational, computational, theoretical, and engineering aspects of black hole research. The research will culminate in a research report and presentation to the team. Program benefits include mentoring by experts in black hole astrophysics, participation in group meetings, and participation in the broader SAO summer internship community.

Program Details:
This will be an online or hybrid internship at the SAO. The typical program will start before June 15th, 2021 and last 8–10 weeks. Compensation will be provided at competitive rates ($650/week), and any travel expenses will be covered.

Apply by March 15th, 2021
Please Submit a CV, 2–3 Recommendation Letters, and a 1–2 page Research Interests Statement to nsbp-sao-eht@cfa.harvard.edu. Applicants must be students and either US citizens or permanent residents. We strongly encourage NSBP members, women, and members of underrepresented groups to apply.
