

**Lawn Care, Turfgrass Maintenance and Landscape  
Best Practices for Social and Physical Distancing Recommendations  
Per State of Ohio Stay-At-Home Order**

In ALL ways: Maintain at least six (6) feet social distancing between employees within your place of business and in all interactions – inside the building as well as outside.

Other guidelines include:

- Only one (1) employee in a service vehicle
- Technicians do NOT knock on customers' doors
- Stagger start times
- Adding additional start times should be done to achieve this reduced group size.
- Each start time should target 10 or fewer technicians
- Start times should be clearly posted.
- Virtual end-of-day Check-Out:
- Technician reviews the Check Out Details reports with his/her manager
- Diligent cleaning within the building:
  - All high-touch surfaces are disinfected several times throughout the day: Door knobs, light switches, toilet flush handles, work space surfaces, telephones, computer keyboards to name a few
  - Do not just spray disinfectant on high-touch items, but clean with disinfectant wipes (if available) or isopropyl alcohol (at 60% concentration or more) or bleach/water mixture using disposable paper towels.
