

President's Message

Sam Dyer

Fall is here. The temperatures are finally starting to cool, the days are getting shorter, and somehow the holidays are already right around the corner. It seems like we were just getting ready to head to San Diego, and now another PAOS Annual Meeting is behind us. There has been a lot happening since our summer newsletter, so let's jump right in.

Our 2026 Annual Meeting in San Diego was a great week. Thank you to everyone who joined us and especially to our faculty, volunteers, staff, board of directors and planning committee who made it happen.

In our summer newsletter, I mentioned that we had received 113 applications for this year's Susan Lindahl Memorial Scholarships. I am happy to introduce the four recipients of our 2026 awards:

Peter Cook — University of Toledo
Nina Coletta — Long Island University
Isabella Hannigan — Case Western Reserve University
Alexandra Toben — Shenandoah University

Each recipient received a \$5,000 scholarship, and three of the four were able to join us in San Diego. It was great having them there and giving our members an opportunity to meet some of the talented students who represent the future of our profession. PAOS and the PAOS Foundation have now grown this program into a \$20,000 annual commitment to PA students, something I am extremely proud of and hope we can continue to build upon in the years ahead.

We also believe that when PAOS brings our Annual Meeting to a community, we should find a way to give something back. This year, we donated \$10,000 to the UC San Diego Student-Run Free Clinic Project. The program provides free medical care and other health services to underserved patients throughout the San Diego area while giving students the opportunity to learn firsthand about caring for vulnerable populations. Their services include medical and dental care, pharmacy services, mental health care, social services, and more. It is a terrific program, and we were very pleased to support the work they are doing in the community that hosted us this year.

We also tried something new in San Diego that I think will have a big impact on PAOS education going forward, podcast CME. As we usually do, the speaker presentations were recorded and are being professionally edited now for PAOS On Demand, and we expect those videos to be available for CME purchase before the end of the year. But we added a new component. While we had all of these great speakers together in one place, we decided to also record conversations with many of them for the orthoPac podcast. For the first time since we started the podcast, we are applying to offer CME for these educational podcast episodes, giving members another convenient way to learn and earn CME through-

President's message continued

out the year. We will message you when those podcasts are approved for CME credit (and the Ortho by the Bay on-demand CME) are available.

Speaking of the orthoPac podcast, we recently published our 300th episode! To mark the milestone, my co-hosts Chuck Dowell and Miles Gilbreath turned the tables on me and had me sit in the guest chair for a conversation about how the podcast got started, how it has evolved over the years, and where I see it going in the future. Three hundred episodes is a milestone I am incredibly proud of, and I want to thank everyone who has listened, subscribed, joined us as a guest, or helped make the podcast what it is today. I hope you enjoy the episode. And we are not finished with 2026 yet.

Our Ortho Bootcamp returns to Charlotte November 6–8. This meeting is designed for new graduates, PAs and NPs who are new to orthopaedics, or anyone who wants to refresh and strengthen their basic musculoskeletal knowledge and clinical skills. The focus is practical education you can take back and use immediately in your practice, including orthopaedic physical examination, radiology, injections, splinting, fracture reduction, coding and billing, hospital practice, and other fundamentals of orthopaedic care. If you are just beginning your orthopaedic career or transitioning into the specialty from another area of medicine, this is the meeting for you.

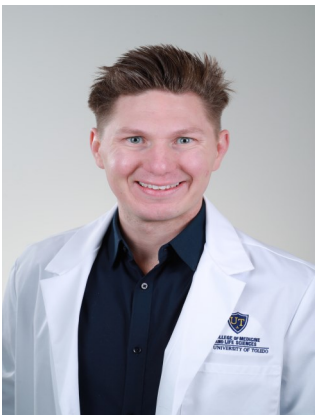

As we head toward Thanksgiving, the holidays, and the end of another year, I want to again thank all of you for supporting PAOS through your membership, participation in our meetings, and by choosing us for your CME. Your support allows us to do everything I have talked about here — provide quality orthopaedic education, support PA students through our scholarships, give back to the communities that host us, and continue developing new educational opportunities for our profession.

Enjoy the cooler weather, have a wonderful holiday season with your family and friends, and hopefully find a little time to slow down and enjoy it.

Thanks again for your continued support of PAOS. I hope to see you at one of our meetings soon.

Sam Dyer, PA-C

Southwest Region Updates (AZ, CA, HI, NV, UT)

Krista Bartlett

The 26th Annual Physician Associates in Orthopedic Surgery (PAOS) Conference, "Ortho by the Bay," held at the Hilton San Diego Bayfront from August 31 to September 4, 2026, offered an elite blend of cutting-edge continuing medical education, immersive hands-on labs, and PA networking. Feedback from the conference was that it "was one of the best ones yet!" Featuring expert lectures from renowned surgeons and PAs, specialized regional faculty, intensive hands-on training, and an exceptional lineup of professional development event. The annual gathering served as a fantastic destination for orthopaedic PAs dedicated to advancing their clinical expertise and patient care standards

We were very proud to present the Susan Lindahl Memorial Scholarships to four wonderful winners. The candidates each received \$5,000 scholarships, as well as a trip to San Diego to present their poster board presentations at the annual conference! One more hooray to Nina Coletta, Peter Cook, Isabella Hannigan, and Alexandra Toben!

Krista Bartlett, PA-C, Southwest Regional Director

Arizona news- The University of Arizona officially received accreditation for its brand-new Physician Assistant (PA) program. Additionally, Arizona officially became the 22nd state in the nation to enact legislation joining the PA Licensure Compact (HB2190/SB1238). This milestone helps streamline practice across state lines for qualified PAs, reduces bureaucratic paperwork, and boosts cross-state patient access to care.

California news- California's PA practice landscape shifted significantly with the implementation of Assembly Bill 1501 (AB 1501). The law officially increased the maximum physician-to-PA supervision ratio from 1:4 to 1:8 in all healthcare settings. Previously, a 1:8 ratio was restricted narrowly to in-home health evaluations. This uniform statewide change gives hospital systems and clinics added staffing flexibility.

Hawaii news- Hawaii lawmakers heavily advanced Senate Bill 3105, a measure seeking to authorize the state to join the national PA Licensure Compact.

Nevada news- SB 294 has significantly expanded clinical capacity by increasing the supervision ratio, allowing a single physician to oversee up to six PAs. For experienced PAs with over 4,000 hours of practice, Nevada has transitioned toward a collaborative model that favors professional autonomy over direct oversight.

Utah news- The University of Utah's Physician Assistant Program (UUPAP) within the Spencer Fox Eccles School of Medicine maintains its elite standing, consistently ranked among the top PA programs nationwide (holding the #3 spot in *U.S. News & World Report's* graduate school rankings). UUPAP has also expanded specialized training pathways focusing on Utah's rural and tribal healthcare settings.

Northwest Region Updates (AK, ID, MT, OR, WA, WY)

Chris Merchant

Greetings from Montana! I am so excited for the arrival of Fall since this is the last month that I'll ever have to take the PANRE exam!

I hope many of you were able to join PAOS in San Diego. It was an excellent conference and beautiful location. Next years Annual PAOS conference will be in Nashville, TN.

As always, if I can be of any assistance to my fellow PAs in the Northwest Region, please don't hesitate to contact me. christophermerchant@benefis.org

Chris Merchant, PA-C, MPAS
Northwest Regional Director

Washington- www.wapa.com

WAPA will be joining with OSPA holding their annual fall conference November 1-4, 2026 in Cle Elum, WA at the Suncadia Resort. [WAPA Fall Conference 2026](https://www.wapa.com/conference)

Alaska- www.akapa.org

I wrote about this topic for the summer newsletter, but I'll include it again as I feel that it is important legislation. AKAPA has 3 different legislative bills presented this year working towards improving patient access to care, modernization of the PA profession in Alaska law, and recognizing the title of Physician Associate in Alaska law.

The All Alaska Medical Conference will be held October 14-16, 2026 in Anchorage, AK. [All Alaska Medical Conference 2026](https://www.akapa.org/conference)

Idaho- www.idahopa.org

Southeast Region Updates *(AL, DC, DE, FL, GA, KY, MD, NC, SC, TN, VA, WV)*

Miles Gilbreath

A federal court has blocked the Department of Education from excluding PA students from the higher federal loan limits reserved for professional degrees. On June 25th the U.S. District Court for the District of Columbia stayed the Department's narrowed definition of "professional degree" in its RISE rule, meaning PA students are not held to the \$20,500 annual cap and can borrow at the professional level, up to \$50,000 per year, while the order remains in effect.

The court found the Department likely exceeded its legal authority by adding requirements Congress never wrote into law, including a test tied to supervision by another professional. The stay came just days before the rule took effect on July 1, so the portion excluding PA students from the higher borrowing tier never went into effect. The Department has since issued updated guidance recognizing PA programs as professional degree programs for purposes of the new loan limits.

The ruling is preliminary relief, not a final decision. AAPA and PAEA filed the lawsuit on June 3, and the case is still pending. The government may appeal, and the ruling does not bring back the Grad PLUS program, which was eliminated under the One Big Beautiful Bill Act. It only affects which programs qualify for the higher borrowing caps.

If you precept students or hire new graduates, the pipeline into our profession is safer today than it was in the spring, but it is not settled. If you know a student or applicant who is unsure about financing PA school, point them to their program's financial aid office and to AAPA's student loan page below. You can also help by asking your representatives to support HR 6718, the Professional Student Degree Act introduced by Rep. Michael Lawler, through the AAPA Advocacy Action Center. And as always, please reach out to me with any news that matters to you so I can explore it more within the SE newsletter.

Miles Gilbreath MCHS, PA-C
Southeast Regional Director
Mileslg.pa@gmail.com

State Updates:

Alabama Society of Physician Assistants –PA Licensure Compact (HB156) signed by Governor March 17.

DC Academy of Physician Assistants- Upcoming virtual events listed on DCAPA website.

Delaware Academy of Physician Assistants- PA modernization bill (HB 325) signed May 12 - Title change, independent practice for experienced PAs, direct payment, primary care designation and regulatory counsel established.

Florida Academy of PAs- [SB668](#) (removal of supervision requirements for experienced PAs) died in Senate Health Policy Committee March 13. HB 683 did not make it past rules committee.

Georgia Association of Physician Assistants- HB1295 (PA compact) did not pass and will not carry over. HB717 signed to law (ketamine therapy)- amended to include all APPs during session.

Kentucky Association of Physician Assistants- SB 116, PA modernization, signed to law on April 10- collaborating physician language, schedule II prescription (72-hour supply) and removes outdated supervision statutes. KAMA virtual CME symposium Oct 15-16.

Maryland Academy of Physician Assistants- Maryland PA parity act (SB326) signed to law April 26- Adds PAs as authorized practitioners for list of tasks.

North Carolina Academy of Physician Assistants- HB672 (OTP) and SB 190 (Compact) . [NCAPA](#) has posted 2027 in legislation of Directors and Nominating Committee candidates.

South Carolina Academy of Physician Assistants- PA modernization bills SB44 and HB2579 both remain active in session. SCAPA 2026 CME conference Oct 7-11- Hilton Head Island

Tennessee Academy of Physician Assistants- PA compact bill (SB1863, HB1867) signed into law April 22. TAPA fall fest Oct 5-9- Gatlinburg TN

Virginia Academy of Physician Assistants- HB4715 did not advance. [SB956](#) passed the Senate 34-0 on March 3 and was sent to House Health and Human Resources where it subsequently died- this bill removed physician oversight of PAs and allowed PAs to own medical practices.

West Virginia Association of Physician Assistants- HB4715 did not advance. SB956 passed the Senate 34-0 on March 3rd and was sent to House Health and Human Resources where it subsequently died- this bill removed physician oversight of PAs and allowed PAs to own medical practices.

Meet our new Student Board Members

Hi my name is Nina Coletta and I am a current clinical year PA student at Long Island University in Brooklyn, NY. I am anticipated to graduate in November 2026 and look forward to pursuing a career as an Orthopaedic Surgery Physician Associate. Outside of my studies, I enjoy going to baseball games, exercising, yoga, traveling and spending time at the beach! One of my favorite things about being a PA is the opportunity to meet and care for a diverse range of patients from different ethnic and socioeconomic backgrounds. I am also incredibly grateful for the many opportunities that pursuing a career as a PA has brought into my life!

My name is Alex Toben, and I'm a second-year PA student at Shenandoah University, graduating in December 2026. I'm originally from Virginia Beach and hope to pursue a career in orthopaedics after graduation, with interests in sports medicine and total joint surgery, but I'm open to any subspecialty! One of my favorite things about being a PA is learning from and working alongside so many different healthcare professionals while making a meaningful difference in my patients' lives. I hope to continue contributing to orthopaedic research and advocacy throughout my career and to participate in international service trips.

Chris Wheeler

Greetings from the Northeast Region!

Fall is arriving quickly here in New England, with the leaves beginning to turn and the days getting shorter. It was great meeting so many of you at the conference in San Diego. It's always a wonderful opportunity to connect and get to know PAs from across the country. For those of you in the Northeast, please don't hesitate to reach out if there's ever anything I can do to assist you. I'm always happy to connect and help however I can.

Wishing everyone a wonderful fall season!

Best,

Chris Wheeler, PA-C, MMSc

Syringe
not included.

Patent Pending

Gray Syringe Assist with Ergonomic Handle

Designed by Robert Gray, MD

For use in the O.R. or the office, the design helps to prevent hand fatigue and pain when injecting with a 20mL syringe over multiple cases

- Sterilizable for O.R. use, such as injecting the posterior capsule during TKA
- Especially useful for injecting preoperative local anesthesia for WALANT surgery
- Uses finger flexors to generate more force over more surface area than only the thumb flexor
- Ratchet mechanism ensures maximal grip force generation throughout entire injection

Lambotte Osteotomes with Handle

Designed by John Cherf, MD. Half inch width version designed by Joel Wells, MD.

Designed with a handle for better control, which helps reduce rotation of the osteotome during use

1/4" Straight
#5250-01

1/4" Width

1/4" Curved
#5260-01

Capello Patient Positioner

Designed by William Capello, MD

Provides stable positioning of a patient during hip procedures

Set with 2-Piece Board #4090
Set with 1-Piece Board #4095
Parts Also Available Individually

Two-piece board design
for easy handling

Also available:
optional peg pads and post
extensions for all pegboards.

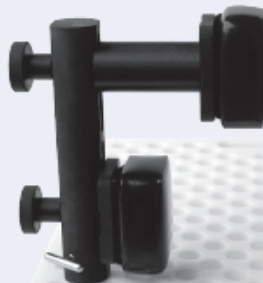

White Aspiration Handle

Designed by Edward White, MD

Designed for aspiration of cavities or spaces that have greater than 20 ml volume, such as joints, bone marrow, and the iliac crest

Works with a
60 ml syringe
only. Syringe
not included.

#1131

Large Patient Peg Board Positioner Post Assembly

Designed by Paul Ramsey, MD

Especially helpful with large patients where reaching the a.s.i.s. is needed for stabilization

Set #4150-10P
Also Available Individually

Set includes one Post Assembly Adapter, one 10" Post with 2 Pads, one 2" Spacer with 4" Knob, and one 4" Spacer with 6" Knob.

NOTE: The peg board positioner is available separately and is not included with this assembly set.

High Platelet Yield. Single 10-Minute Spin.

XCELL PRP System Features

Single 10 minute spin for efficient PRP preparation

Platelet yield supporting more than **10 billion platelets** per dose with an **84% capture rate***1

Flexible preparation of leukocyte-rich or leukocyte-poor platelet-rich plasma

BioventusPRP.com

*Data is based on the collection of samples of 60 mL of whole blood from 44 patients. Samples included 6 mL of A-CDA, with an average baseline platelet count of 214.5 μ L.

Reference: 1. Apex Biologix. Data on file. DOC-0004, June 2025.

Summary of Indications for Use: The XCELL PRP System is intended to be used for the safe and rapid preparation of autologous platelet-rich plasma (PRP) from a small sample of peripheral blood at the patient's point of care. The PRP is mixed with autograft and/or allograft bone prior to the application to a bony defect for improving handling characteristics.

Contraindications: The XCELL PRP Platelet Concentrating System may be contraindicated when used in a non-sterile environment, patients taking aspirin within 72 hours, drugs that affect platelet function, patients with any serious medical conditions that would make the subject unable to safely tolerate the extracorporeal blood components and/or volume required for the procedure. The blood products from this device are not to be used for transfusion.
