Who Are We?

The purpose of the Pennsylvania Psychological Association is to advance psychology in Pennsylvania as a means of promoting human welfare.

PPA carries out its mission through activities that advocate vigorously for public access to psychological services, that educate and support the professional development of members, that educate the public through disseminating and applying psychological knowledge, and that maintain and build organizational strength.

Founded in 1933, and now with over 2800 members, PPA is the third largest state association affiliated with the American Psychological Association.

Why we are PPA...

"When I've needed support, it has always been available. There is a feeling of trust that I will be supported."

"PPA is the most useful organization to support our profession - lobbying, information and CE's are all obtainable. It's the way to stay current in your profession."

"PPA is a real community where psychologists collaborate and help each other. We get great support from each other and get great advice from Sam Knapp and Rachael Baturin on which bills to advocate for and to answer questions about legal and ethical issues."

"PPA is a great resource for information about the field and a way to get questions answered. A strong advocate for PA psychology."

"PPA is the professional association I belong to because of their expertise and leadership in all aspects of the practice of psychology in Pennsylvania and beyond, their powerful advocacy, and because of the wonderful people who make up the membership and make themselves available to those of us just starting out."
