Challenges in Biological and Advanced Medicinal Therapeutic product ATMP manufacturing with GMP compliance

PHSS-UCL Q3P ANNUAL CONFERENCE

10 September 2019
Kensington, London UK

This major PHSS conference, in association with UCL Q3P will address the **key challenges in manufacturing and aseptic processing of Biological and Advanced Medicinal Therapeutic products (ATMPs)** considering challenges in GMP compliance and application of Quality Risk management and new regulatory requirements including revision of EU GMP Annex 1 and relationship with Annex 2.

A blue rectangular box with white text, framed by blue corner brackets. The text is centered and reads: 'SEE OVER FOR MORE'.

Conference Highlights

Regulatory and GMP compliance sessions

- MHRA Speaker (TBC); Challenges in GMP compliance for processing biologicals and ATMP products. Perspective on Annex 1 revision.
- Key points on compliance with Annex 1 revision including application of QRM and preparation of a Contamination Control Strategy (CCS). GMP auditor (TBC).
- Overview of PHSS Clarity on GMP Guidance notes (14) published in response to MHRA Blogs, Annex 1 revision. James Drinkwater Chairman of PHSS and leader of Aseptic processing & Bio-contamination special interest group.

Biological product and ATMP Processing sessions

- Preparation of an Aseptic-Containment Strategy (ACS) to compliment the Contamination control strategy (CCS) for sterile product processing where hazardous, potent products processing with a balance between Operator and Patient safety. Presented by PHSS Containment special interest group member.
- Biocompatibility of Vaporised hydrogen peroxide bio-decontamination cycle residuals with biological products: Impact studies and analytical methods (Bio-Pharmaceutical industry speaker).

Environmental monitoring sessions

- Design of an EM program for environmental monitoring during aseptic processing of potent and hazardous biological products including considerations on cross contamination control.
