
The Data Collector

Volume 27, Issue 3

May 2026

General Chapter Meeting

Date: Thursday, May 14, 2026

Topic: Stormwater Basins and Control Facilities – What to Survey?
Speaker: Susan Giannantonio, PE
Senior Project Manager, NTM Engineering, Inc.

Stormwater basins and other stormwater control facilities have evolved over the last 50+ years to include numerous different components as regulations have evolved. Surveyors are challenged to recognize the types of facilities and be on the lookout for the key components when surveying existing or newly constructed stormwater control measures (SCM). We will review common types of SCMs, define component terminology and explain what information is critical for topo data collection.

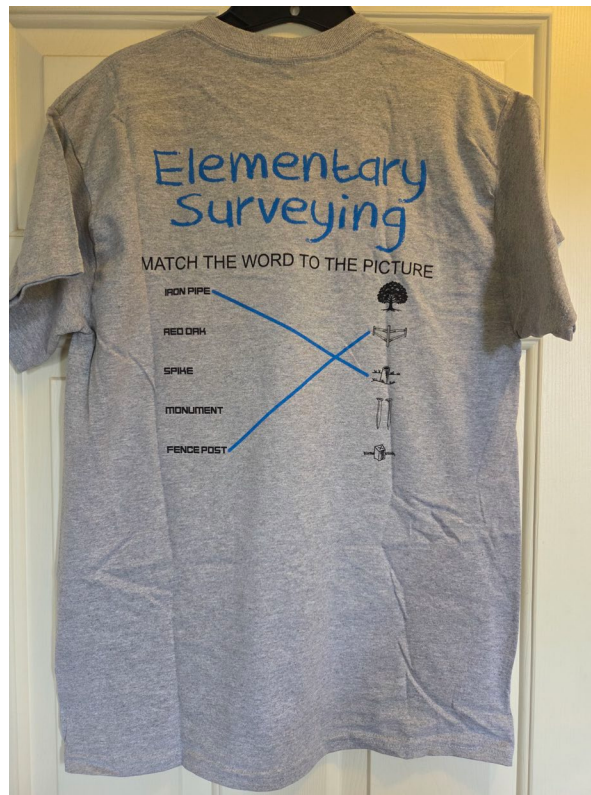

Time: 6:00 p.m. Happy Hour
6:30 p.m. Dinner
7:30 p.m. Business Meeting and Presentation

Please Contact: Richard Shewman shewmanpls@earthlink.net (preferred)
(610) 223-1315

New PSLS Logo Gear on Sale

The Delaware Valley Chapter debuted the newest t-shirt design at the 2026 Conference. This new design includes a whimsical take on the well-known “Elementary Surveying” textbook. All profits for the sales of Del-Val logo gear goes toward the sponsorship of an unlicensed surveyor to the annual Surveyors Conference.

You can get your t-shirts delivered directly to the Chapter Meetings. Just add your request when you RSVP to Rich. Only grey with the multi-colored printing, but we have all sizes M-3XL. Price is a measley \$15 each or 2/\$25. Any shirts for sale on the website can also be ordered this way. Save the shipping fee!
