

21st Century Club Nomination Form

Founded in the 1960's, the Century One Club began a tradition of support for the education program of RETA. The first contributions were made to underwrite the costs associated with developing our very first course book series. The contribution to the club is \$100 (relating to the Century aspect) and membership was limited to 100 people. In 1998, the last name to the Century One Club was added.

Since a new century was dawning, the tradition continues at RETA with the forming of the 21st Century Club. The revenues that come into RETA through a club contribution are set aside to pay for education material project work and development that are outside the scope and resources of the general budget. In the upcoming years, RETA has the need to translate IR-2 into Spanish, convert IR-1, IR-2, IR-4, BE-1 and BE-2 into SI unit versions, develop instructor resources and develop short video segments clips that demonstrate operating tasks and procedures common to the industry. The total scope of this project work is several thousand dollars. These project goals can be met through a combination of volunteer work and generous support, one club member at a time.

Member names of the 21st Century Club are listed along with the 100 members of the Century One Club in the program guide distributed at the annual meeting and Conference. Why not add your name to those listed below?
