Refrigeration Engineers and Technicians Association

Willamette Valley Chapter - Albany, Oregon

RETA's Mission to enhance the professional development of industrial refrigeration operating and technical engineers

TO:	**All Users of Ammonia Refrigeration**
WHAT:	**Chapter Monthly Meeting**
WHEN:	***Tuesday, November 10th @ 5:30pm***
WHERE:	**APCCO** **3501 Brook Lake Rd NE Salem, OR 97303**

For **November** our meeting will have Jim Hesel, P.E., from APCCO He will be presenting a basic overview of CO_2 as a refrigerant, including how CO_2 refrigeration systems differ from traditional ammonia refrigeration systems.

Jim Helsel, P.E. is Vice President of Construction at APCCO, where he supervises all construction projects on the West Coast to verify reliability, safety, engineering principles, and efficient design. He has over 15 years of experience in the industrial refrigeration industry, successfully engineering, designing, proposing, and executing efficient projects, including the design and installation of industrial CO_2 refrigeration systems for production facilities. Jim is a licensed professional engineer who helps production facilities remain in compliance with state regulations. He is a member of IIAR, RETA, ASHRAE, and ASME.

Please RSVP by November 3rd to insure ample seating, food and refreshments for this meeting.
