"Thank you very much for having organised the CTA Academy for us in India. It definitely helped me in reporting cases with much more comfort and accuracy. I have also tried satisfactory dose reduction in few subjects with fine imaging results."

Dr. Shubhra Rathore,
Assistant Professor, Department of Radiodiagnosis, Christian Medical College and Hospital, Ludhiana, Punjab

"The SCCT workshop organised by your team indeed was commendable and worth praising as the teachers came to students, and we all got an opportunity to learn from the giants in their fields. I would like to congratulate the team."

Dr. Manphool Singhal, MD, DNB, MNAMS
Assistant Professor, Department of Radiodiagnosis & Imaging, PGIMER, Chandigarh, Punjab

SIEMENS | SOCIETY OF CARDIOVASCULAR COMPUTED TOMOGRAPHY

Educational Objectives

At the conclusion of this course, attendees will have an in-depth understanding of:

- Guidelines of Cardiac CT Imaging
- How, when and why Cardiac CT is performed
- Tips and tricks for superior image acquisition and processing
- Post-processing techniques of Computed Tomography Coronary Angiography datasets
- Interpretation of Coronary CT Angiography datasets
- Recognise typical and complex Coronary Artery Stenosis in Computed Tomography Coronary Angiography
- Detect artifacts in Computed Tomography Coronary Angiography
- Limitations of Coronary CT Imaging
- Methods for radiation dose reduction

- Active interaction with leading international and national faculties in Coronary CT Angiography
- All attendees will receive an electronic certificate with credit for 50 cases to use towards level 2 verification.

SCCT Membership Benefits are:

- Journal of Cardiovascular Computed Tomography, print and online subscriptions
- Discounted registration rates for the SCCT Annual Scientific Meeting and courses
- Discounts on the SCCT's educational resources
- SCCT's newsletter and bi-monthly e-newsletter
- Recent publications, quarterly electronic publication on summaries of recent papers
- Clinical Competence Statement on Cardiac Imaging with Computed Tomography and Magnetic Resonance
- Discounts on SCCT co-sponsored educational programmes

These intensive two-day training courses with expert faculty provide a unique opportunity to improve your cardiovascular CT reading skills through personal hands-on training at workstations, with immediate feedback through Invasive Coronary Angiography for every case.

The courses are directed toward Cardiologists, Radiologists, Cardiac Surgeons and other physicians with basic prior knowledge and especially those with clinical experience in CT interpretation.

A set of all-new Coronary CT Angiography cases with a wide range of difficulty levels has been compiled, so the 2018 International Cardiac CT Course will be extremely useful both to first-time attendees and to experienced participants who want to "brush up" on their reading skills.

Only the first 20 registrants for each course will be accepted on a first-come, first-serve basis.
