SCMR Registry Search Request

Researchers must complete this form when requesting a search of the SCMR Registry database.

A. Search Request Purpose
The purpose of this request form is to provide the SCMR Registry Committee with information that will help determine whether the SCMR Registry may or may not contain the data you are seeking. If it is determined that the Registry is likely to contain the desired information, the Registry Committee will work with you interactively to structure a search that can optimally achieve your research goals. The Registry committee will also help to ensure that your project is aligned with the mission and priorities of the SCMR, and will evaluate your proposed project for any potential overlap with other proposed or ongoing projects. If there is potential overlap, the committee will help to resolve any conflict and will encourage collaboration. If you are not a contributor of data to the Registry, we recommend that you partner with one of the contributing centers in the formulation and execution of your project. A list of those centers and investigators can be found on the SCMR Registry webpage.

A1. Project title:

A2. Research objectives (up to 200 words):

A3. Briefly state the expected value of the research (up to 50 words):

A4. Principal and Co-Investigators (names and Institutions):

A5. Describe the search criteria you propose to use to identify the project data.

A6. If you wish to provide any additional supporting documentation, e.g., conference abstracts, previous publications, etc., please upload as .pdf files.
