BACKGROUND
The International Sculpture Center (ISC) champions the creation and understanding of sculpture and its unique, vital contribution to society. The ISC seeks to expand public understanding of sculpture internationally, demonstrate the power of sculpture to educate, effect social change and engage artists & arts professionals in a dialogue to advance the art form, while promoting a supportive environment for sculpture and sculptors.

The ISC established the Outstanding Student Achievement in Contemporary Sculpture Award Program in 1994 to recognize young sculptors and encourage their continued commitment to the field of sculpture. Through this initiative, the ISC hopes to encourage students and participating institutions to use the ISC’s many resources to assist students and faculty with their professional development. The program also spotlights participating universities, colleges and art schools and their Sculpture Programs.
