

Philosophy –

I believe more than ever that SDA is a tremendous tool to the A/E/C industry. The educational seminars, webinars and just being around like-minded individuals and groups I have gained more knowledge than I ever imagined. My principal has commented on more than one occasion that he has seen growth in me and my approach to situations. Stepping up and taking on leadership roles has forced me out of my comfort zone and into a world of confidence and self-worth. I have achieved my certification, and have committed to applying for the president-elect position. I have greatly enjoyed experiencing all that it takes to be a part of an organization at this level, to be a part of the decision making process and seeing how all the committees and chapters and members at large all meld together to make SDA what it is. My hope is to express this excitement and growth to others in hopes that they will take their SDA experiences to another level.
