PROGRAM INFORMATION

COURSE DESCRIPTION AND OBJECTIVES

The SAR 2018 Annual Scientific Meeting and Educational Course represents the Society's major educational endeavor, which brings together outstanding educators for a program highlighting:

- Use of new and emerging technologies in the imaging diagnosis of abdominal and pelvic pathology
- Problem solving for common issues in abdominal and pelvic imaging with practical solutions
- Extensive small group workshop presentations allowing registrants to individualize educational content

The course format utilizes didactic lectures, general interest presentations, panel discussions, technical displays and interactive workshops in a mix that optimizes the educational opportunities for registrants. The Scientific Paper Sessions will be open to all Society members. Numerous educational and scientific posters spanning all aspects of abdominal imaging will be available to all course participants for study throughout the meeting. Designed primarily for radiologists in practice and in training, this course will also benefit all physicians who care for patients with gastrointestinal and genitourinary diseases.

At the conclusion of the course, registrants should be able to:

1. Apply the most up-to-date and practical information for imaging diagnosis and intervention in common abdominal problems
2. Appropriately implement new and emerging techniques in abdominal and pelvic CT, MR, US and PET
3. Successfully manage common problems encountered in performing everyday abdominal examinations
4. Understand the newest topics and results in clinical research in abdominal radiology

WORKSHOP AND SELF-ASSESSMENT MODULE INFORMATION

Workshop sessions will be offered Tuesday and Thursday in a small group format. The program offers 202 workshops covering a broad range of practice management, and abdominal and pelvic imaging topics. Special workshop tracks are identified by a coding system detailed within the brochure program in order to simplify your workshop selection process.

The Self-Assessment Modules (SAM) presented in this activity on Comprehensive Image-guided Intervention for the Abdominal Radiologist, Mastering the Hepatopancreaticobiliary Tumor Board, Below the Belt: Imaging Techniques in the Pelvic Floor and Perineum, Pitfalls in GI Imaging, and What the GU Oncologist/Urologist Wants to Know have been qualified by the Society of Abdominal Radiology in meeting the criteria for self-assessment toward the purpose of fulfilling requirements in the ABR Maintenance of Certification Program. If you wish to register for a SAM, you must submit a fee of \$35 for each SAM, even if you do not wish to receive SAM credit. This fee covers the production costs associated with the SAMs.

Donations to The SAR Fund may be made in honor of or in memory of a specific individual. We invite you to join your colleagues in making a tax-deductible donation to The SAR Fund today. Each year we recognize all donors on the SAR website and at the Annual Meeting. You will have the opportunity to make a contribution during the online registration process. You can also visit the Society website to make a donation and find additional information about The SAR Fund.

This year, The SAR Fund will be used to support up to six \$1,000 Travel Scholarships for Trainees. These merit-based scholarships will be provided for oral presentation of a scientific abstract at the Annual Meeting. All abstract submitters have the opportunity to indicate interest in being considered for a scholarship during the initial abstract submission process.
