Breaking the Remediation Cycle: A New Look
Alana McAnally, University of Central Oklahoma

Abstract
This article describes the implementations of pathways and co-remediation taking place at the University of Central Oklahoma, a four-year regional metropolitan university. The process and success rates of the remedial pathways to gateway courses are described. Also, the creation, implementation, and trial semesters of the co-requisite model are thoroughly explained and success rates are given.

Alana McAnally received her master’s in curriculum and instruction in mathematics education from The University of Texas at Arlington, and is currently working on her PhD in mathematics education at the University of Oklahoma. For the past five years, she has served as the director of developmental mathematics at The University of Central Oklahoma.
