

Amy Nathanson, PharmD, BCACP, AE-C, Clinical Programs Manager, Johns Hopkins Home Care Group.

As Clinical Programs Manager for specialty services at Johns Hopkins, I oversee the patient management and the collaborations between the clinical pharmacists, prescribers and patients. Over the past five years we have developed high quality, accredited, patient care services to support patients taking specialty medications that have special dosing requirements and need monitoring for efficacy, toxicity and adherence. I am also the residency program director for the Johns Hopkins Home Care Group, PGY-1 Community Pharmacy Residency Program and have helped to grow the program from its inaugural year, to now, in progress with our fourth residency class. In addition, I am a preceptor and work with several student pharmacists each year. I am a graduate of the University of Maryland School of Pharmacy and completed a Community Pharmacy Residency at the University of Maryland School of Pharmacy and Catonsville Pharmacy.

Over the past five years I have been an active member of the Maryland Pharmacists Association, first as a member of the Professional Development Committee and then as Co-Chair of the Professional Development Committee. I've been involved with supporting Maryland Pharmacists to become Certified Asthma Educators, helping coordinate activities of the MTM summit, and in process of creating materials to educate other health care professionals about MTM and how pharmacists can be integral members of the health care team. I have also participated in and provided insight during MPhA strategic planning.

I am committed to being a voice of pharmacists in Maryland and representing our profession in the community. I believe, as pharmacists, we do have a unique role a member of the health care team in all settings. It is also important to share these visions with our student pharmacists who are important to the continued development of our profession.

Thanks for your support! I look forward to serving our state and our profession as MPhA trustee.
