WELCOME

Dear colleagues and friends,

Welcome to Orlando and the 15th Annual Scientific Sessions of the Society for Cardiovascular Magnetic Resonance! The Board of Trustees shares a strong commitment to advancing the science and practice of CMR and your attendance supports this goal and the vision and mission of SCMR.

I would like to thank the 2012 Program Committee, chaired by Dr. Raymond Kwong and Dr. Jeanette Schulz-Menger, for their time, expertise, and dedication given to designing a program guaranteed to be up-to-date, boundary pushing, and thought-provoking.

This year's meeting continues the trend of recent meetings that have focused on patient outcomes and cost effectiveness, with an Opening Plenary session translating these concepts onto the impact of CMR on Patient Care. We are honored and delighted to have Dr. Robert Bonow, a world recognized clinician and scientist in cardiovascular care, our own Past-President of SCMR Dr. Warren Manning, and SCMR Board Member Dr. Matthias Stuber who will be presenting in the opening plenary.

The scientific program has been developed to emphasize categories along four targeted tracks: General CMR, Congenital/Pediatric, Basic Science, and Case Studies. This year's program continues to build on prior years with the outstanding group of experts assembled to discuss the wide range of interesting topics and provide both an overview of CMR for those new to the field, along with sessions designed for those acquiring a deeper knowledge of CMR technology, techniques, and applications, as well as potential for the future. In parallel, the Technologist's Workshop will offer technologists sessions focused on both their clinical and research educational needs.

For those arriving early, the Pre-Conference programs include a Physician's Course, a Congenital/Pediatric Course, and for the first time a two-day joint workshop with ISMRM on Flow and Motion that takes advantage of the natural mutual interests our two memberships reflect. This joint workshop is the first of what we hope will be many more to come as we continue to expand our collaborative efforts with others interested in CMR and cardiovascular care.

Again, I extend a warm welcome to each of you and feel confident you will value the knowledge, contacts, and insights gained at the 2012 SCMR Scientific Sessions.

Sincerely,

Scott D. Flamm, MD President, SCMR

THE SOCIETY FOR CARDIOVASCULAR MAGNETIC RESONANCE

SCMR VISION STATEMENT

The Society for Cardiovascular Magnetic Resonance (SCMR) will be the leading international representative and advocate for all physicians, scientists, and technologists working in CMR to improve patient outcomes through excellence in education, training, standards, research and development.

The Mission of SCMR is to:

- Be the premier international model and provider of CMR education, training, standards development, and accreditation.
- Maximize clinical effectiveness of CMR through coordinated comparative effectiveness research efforts resulting in evidence-based guidelines to enhance patient care and outcomes.
- Continually enhance the accuracy, efficiency, and effectiveness of CMR in cardiovascular healthcare through technological advances.
- Promote scientific exchange through organization of an annual international scientific conference, publication of the *Journal of Cardiovascular Magnetic Resonance*, and interactive internet-enabled tools including the SCMR website.
- Build an expanding global membership of physicians, scientists, technologists, and interested healthcare partners focused on clinical applications and research in CMR.
- Develop and advance close working alliances with related societies, industry partners, and governmental and regulatory agencies to more effectively integrate and elevate the use of CMR within cardiovascular healthcare.
