The Theriogenology Foundation is a global non-profit which believes that the preservation and reproduction of animals is essential to human welfare. By engaging specialists in animal reproductive health and productivity, the TF formulates and implements solutions to combat human and animal diseases which threaten food security and the social and economic health of the world’s population. Through the efforts of the TF, students have the opportunity to travel and participate in educational programs through specialized grants. Scientists have the resources to research and develop means of fighting disease to help the global economy develop healthier, self-sustaining food production practices, and veterinary practitioners are able to assist clients with animal reproduction through advances in theriogenology.

Mission Statement
The Theriogenology Foundation secures and allocates resources dedicated to advancing the science and practice of animal reproductive medicine.

From the pen of the president
An individual may have a great vision; but very few great things result from that individual working alone. Like a river whose many tributaries come together to create one great body, the Theriogenology Foundation continues to grow with a broad based flow of support.

As we begin our 5th year, we acknowledge the leadership of corporations and individuals who have embraced the value of our discipline and the impact of giving back to the future.

The American Kennel Club has made a tremendous investment in the future of animal reproduction by funding three residency programs beginning in 2014. The American Kennel Club/Theriogenology Foundation Companion Animal Residency in Theriogenology is now established at the University of California at Davis, the University of Pennsylvania and Auburn University. To educate the dog and cat fancier, Royal Canin has pledged support by conducting Canine and Feline Breeder Education Seminars with SFT and ACT members throughout the country.

Our new program, the Student Annual Conference Opportunity, was initiated this fall to encourage alumni of veterinary colleges to support their students by aiding them with expenses so they can experience our yearly meeting. Dr. Kit Kampschmidt stepped up and made the first pledge to benefit Oklahoma State. And this past year, as Dr. Michelle LeBlanc stood down, she left a bequest to The Theriogenology Foundation to be used for what the board thought would best help the next generation of theriogenologists.

Now the Foundation is looking to even further expand its reach and impact. One element that has been vital to our success is the commitment and participation from the Foundation’s board of directors. We now invite you to join us by giving to the best of your abilities. No donation is too large or too small. What is important is that we as a membership come together to support this wonderful organization. Like the river, every contribution flows into one great body in support of the future of theriogenology.

Thank you and welcome to THERiver.

Anita M. Migday, DVM, MS
President, Theriogenology Foundation
As I look back over my career in veterinary medicine, I realize how blessed I am to have found a passion for theriogenology. After thirty-five years I still get excited with each new pregnancy I find on ultrasound, with each new embryo's heartbeat, with each infertility diagnosis that could point the way to a successful treatment plan. Theriogenology has provided a means to stimulate my mind, to feel a sense of accomplishment, to associate with a wonderful group of colleagues, and to support my family.

For all these reasons and more, I am pleased to make a bequest to the Theriogenology Foundation in my will. I want to play a part in ensuring that other veterinarians will have the same opportunity to pursue their passion. I encourage everyone who wants to support the Theriogenology Foundation to go to the website and explore your options. In choosing my plan it was important to me to have the ability to modify my bequest if my family’s needs change.

Thank you for considering making a planned gift to the Theriogenology Foundation. It has been rewarding to me to see the very positive accomplishments of the Foundation in its early years and it is exciting to consider the amazing gains that will be made in the future.

Best regards,
Tom Riddle, D.V.M.

Everyone who wants to support the Theriogenology Foundation is encouraged to go to theriofoundation.org and click on “GIVING”. The information provided is excellent and allows you to choose an option that best suits your situation. The “Plan-a Gift” section is particularly helpful for guidance in planning a gift that works best for you. There are giving options for all levels and numerous tools on the website to help you with the process of choosing the option that best suits your needs. TF certainly recommends working with an attorney to make sure that your wishes are followed correctly. Whatever gift option you may choose, the Foundation will greatly appreciate your support.
TF introduces the SACO Alumni Challenge

The Theriogenology Foundation and The Society for Theriogenology recognize that our veterinary students represent the future of theriogenology. The Annual Therio Conference provides an excellent opportunity for veterinary students to expand their knowledge of theriogenology as well as time to meet and interact with diplomates, veterinarians and other students who share their interest in animal reproduction. With these facts in mind the TF has endeavored to financially support student travel to the conference. In the interest of furthering that support and giving alumni of each CVM the opportunity to support student travel from their alma mater, the TF has initiated "The Student Annual Conference Opportunity (SACO)- Alumni Challenge".

The challenge has been initiated with a $2,000 contribution from Dr. Kit Kampschmidt of The Oklahoma State University CVM. Alumni of each veterinary college are challenged to donate to the fund, designating their contributions to their alma mater, another school or schools of their choosing, or the general travel fund. Contributions will be placed in a separate category in TF's Restricted Funds for this program, designated for students of each CVM. Twenty percent of each donation will be designated to the “general travel fund” to assist students from schools where alumni participation doesn’t rise to the challenge and meet the demand from their college. Students will apply annually to the TF for travel grants. Any unused funds will be carried over year to year.

This is an excellent opportunity for all veterinarians to show support for their alma mater, their school’s veterinary students and theriogenology. The challenge has been made, now you can respond by visiting the TF website at www.theriofoundation.org and clicking on the “Donate Now” button! Designate your contribution to the SACO and specify for which college the funds are designated, or that they may be added to the SACO general fund.

Oklahoma State University alumni Kit Kampschmidt leading the charge says “Go Pokes!” How do you respond???
2012-13 Financial summary

Financial breakdown from January 1, 2012 through November 30, 2013

We are most grateful for your financial support of the Theriogenology Foundation, providing $120,342 during this 23 month period. Unrestricted funds, allowing the foundation board to allot funds to the areas of greatest need, accounted for 80% of these donations.

Your continued contributions will allow us to provide even more support of the Theriogenology Foundation's work in the coming year. Through the generous support of the Society for Theriogenology and the American College of Theriogenologists in covering most of the costs related to operating the Foundation, 77% of funds expended went to directly support programs. Administrative costs (website, office supplies, accounting and board meetings) totaled 11% and fundraising expenses (brochures, planned giving, postage, credit card fees on donations) were 12%.

Your tax deductible support and philanthropic investment enables us to make a huge difference in the advancement of our specialty.
