Welcome to Case Western Reserve University School of Medicine and our Health Education Campus!

As Dean of the School of Medicine at Case Western Reserve University, I welcome you to the 2022 SNMA Region V Medical Education Conference. We are very excited to serve as host to this year’s conference with its important theme of “It’s Crunch Time! Sustaining Momentum While Under Pressure.” Our community looks forward to welcoming colleagues who are underrepresented in medicine from our medical schools across Michigan, Indiana, and Ohio – from students to residents to faculty. I am certain it will be a valued meeting as you gather to discuss important issues related to resilience, recovery, and anti-racism.

In the rebuilding from the coronavirus pandemic, we recognize the need for self-care for all of us and our very intentional work to create an inclusive and welcoming environment for all people across all aspects of healthcare delivery.

The past several years have been challenging for all of us. We continue to grapple with the remaining effects of the COVID-19 pandemic and its spotlight on the health inequities. I am inspired by our medical students and their unwavering dedication to not only address these inequities but to find creative and sustainable solutions. Our School of Medicine has a long and rich history of inclusion with famous alums like Dr. David Satcher, former Surgeon General of the United States. I have been impressed with the action-oriented diversity strategic plan that was crafted by our highly motivated and talented student body. We continue to embrace making the necessary changes to our curriculum to reduce bias and to focus on respect for each other within our academic community.

This past 18 months have included several important inaugural positions for our school including a Vice Dean for Diversity, Equity, and Inclusive Excellence (DEIE), an Assistant DEIE Dean for Students, and two directors to support important programs and trainings. Enjoy your conference and this community of support. I hope the conversations help equip you with tools that will promote your self-care, advocacy, and continued momentum around race in medicine during these changing and challenging times.

Stanton L. Gerson, MD
Dean, School of Medicine
Senior Vice President for Medical Affairs
Welcome to the 2022 Student National Medical Association Region V Virtual Medical Education Conference. After so many years of uncertainty, and all too many Zoom meetings, it is so exciting, and so needed- to be together in person!

Against the backdrop of the unprecedented COVID19 pandemic and the concurrent political and social struggles that were highlighted against it, coming together takes on an even greater relevance. We faced so much, and coming together is a powerful step that will help us to reflect and start to heal. But we cannot become complacent and must work together to disrupt the status quo that has enabled health care inequity, institutionalized racism and socioeconomic disparity to thrive. This year's conference title, “It’s Crunch Time! Sustaining Momentum While Under Pressure,” with its theme of taking care of ourselves and one another while we face and work to dismantle racism, bias, and structural barriers in healthcare is so very timely, and underscores that in order to care for others, we also must care for ourselves.

We are honored to have the opportunity to host you at Case Western Reserve School of Medicine. It is my sincere hope that your time with us in Cleveland is meaningful and inspiring, and that you will go back to your respective institutions with energy and enthusiasm to make a difference, and a renewed sense of community and belonging. And of course, we hope that by the end of your visit you will have realized that Cleveland Rocks!

Sincerely,

Lina Mehta, MD
Associate Dean for Admissions
Professor of Radiology
Case Western Reserve University School of Medicine
Chair, AAMC Committee on Admissions (COA)
WELCOME FROM THE DEAN

It is my pleasure and honor to welcome you to the 2022 Student National Medical Association Region V Medical Education Conference. The Case Western Reserve School of Medicine is delighted to be your host, and we hope that you find the conference to be rewarding and your stay in Cleveland to be enjoyable.

I serve as the inaugural Vice Dean of Diversity, Equity and Inclusive Excellence for the School of Medicine. It has been a pleasure and a privilege to work with our students, staff and faculty who belong to groups underrepresented in medicine. The future of healthcare requires that we identify and support the next generation of medical leaders who are from marginalized populations such that inequalities in healthcare provisions and health disparities become relics of our past and not contemporary qualities of our systems. Each of you represent the future of medicine in this country, and I commend you in your pursuits to become transformative leaders.

“It’s Crunch Time! Sustaining Momentum While Under Pressure.” There is much work to do in dismantling racism, bias and structural barriers within our academic communities and within our healthcare systems. While you work to be the change that you want to see, you must also take care of yourselves and each other. Build community, break down silos and collaborate towards achieving shared outcomes. This is how you will sustain momentum and respond to pressures as you work to positively impact healthcare. I am hopeful especially in considering the talents of our medical students. You represent the change and a bright future.

I wish you a successful conference full of new skills, lots of networking, and a sense of community with purpose over the next few days.

Sincerely,

Blanton S. Tolbert, PhD
Vice Dean of Diversity, Equity and Inclusive Excellence
Rudolph and Susan Rense Professor of Chemistry
Welcome SNMA Region V Members and Supporters! I am delighted to welcome you to the Case Western Reserve University School of Medicine. We are home to three tracks that lead to a medical degree (MD).

- **Our University Program** is a traditional 4-year program with an innovative curriculum that highlights teamwork and exploring the medical literature as a primary source of caring for patients through our Case Inquiry small group learning. The integrated block curriculum provides our students with knowledge of both normal and diseased states for each system paired with two longitudinal courses on structure (anatomy, histopathology, radiology) and doctoring skills (communication, physical exam).

- **Our Cleveland Clinic Lerner College Program** is a 5-year program aimed to create physician investigators. The additional year of dedicated research help students identify important areas of discovery and the tools to advance our knowledge of disease and therapeutics.

- **The Medical Scientist Training Program (MSTP)** is a 7+ year program where students earn both a medical degree and a PhD. This combined degree program includes all of the components of the University Program’s MD with graduate years where students immerse themselves in basic science laboratory exploration across a wide array of scientific areas.

I am excited by your 2022 theme, It’s Crunch Time! Sustaining Momentum While Under Pressure. What a timely topic that will seek ways to continue the very important and arduous work of addressing racism, bias, and the many structural barriers to achieving health equity for every patient across our country while also putting a spotlight on building community, caring for each other, and giving our personal wellness and resilience the attention that it needs.

Congratulations to our student officers, Jaqueline Diaz and Mario-Cyriac Tcheukado for their leadership within the CWRU SOM Chapter and their important role as hosts to the SNMA Regional V Medical Education Conference attendees.

Here’s to great success in your many conference activities!

Sincerely,

Lia Logio, MD, MACP
Vice Dean for Medical Education
Director of the Center for Medical Education
October 2022

Welcome SNMA Region V!

On behalf of The Cleveland Clinic Lerner College of Medicine (CCLCM) of Case Western Reserve University (CWRU), we welcome you to our Health Education Campus and Cleveland.

CCLCM is a distinct program within the CWRU School of Medicine with a curriculum designed to train graduates who will have excellent clinical skills, expertise and experience in research, and a passion for scientific inquiry. Upon completion of the five-year curriculum, the graduates’ MD degree has a Special Qualification in Biomedical Research. Learn more about CCLCM at https://my.clevelandclinic.org/lerner-college-medicine/about#overview-tab

This year’s Regional Medical Education theme, It’s Crunchtime, Sustaining Momentum While Under Pressure speaks to our commitment to stand against racism, and is a timely reminder to continue our work, together, to dismantle racism and bias in healthcare and education, and importantly, to care for each other and for ourselves.

We are honored to host you, and trust you will enjoy the workshops, engaging and inspiring speakers, research presentations, and connecting in person with treasured and new colleagues. We commend you for taking part in this conference and sharing ideas to support each other and sustain that momentum!

Sincerely,

Bud Isaacson, MD
Executive Dean

Christine Warren, MD
Associate Dean of Admissions and Student Affairs

Monica Yepes-Rios, MD
Assistant Dean, Diversity Equity and Inclusion
October 2022

To: Attendees of the 2022 SNMA Region V Medical Education Conference

On behalf of Case Western Reserve University Medical Scientist Training Program, I would like to welcome you to our Health Education Campus and Cleveland for the 2022 SNMA Region V Medical Education Conference. I wish you a successful, productive and healthy meeting!

Dean Gerson and Vice Dean Tolbert have expressed our commitment to diversity, equity and inclusion, as well as certain key strategic initiatives and accomplishments for our School of Medicine. The values that they have expressed also apply to our Medical Scientist Training Program (MSTP) and have the full support of our MSTP leadership team, which includes Dr. Monica Yepes-Rios’ work for issues of diversity, equity and inclusion involving our MSTP students. Our diverse group of MSTP students are addressing a wide array of research topics, which include topics important to the health of minority and disadvantaged populations.

MSTP students pursue both MD and PhD degrees, preparing for careers as physician-scientists and as leaders in biomedical research, bringing their unique perspectives to advance clinical and translational research goals. Our MSTP curriculum combines integrates the CWRU University Program MD curriculum with a student’s choice of many PhD programs available at our School of Medicine or School of Engineering. Our unique approach to integrating these curricula into an effective and efficient training program includes early and deep involvement in research that accelerates the start of PhD research projects. Learn more about us at https://case.edu/medicine/mstp/

There is a national need for physician-scientists in tomorrow’s biomedical research workforce, and a diverse research workforce is essential for broad success and the ability to address a wide scope of issues, including topics of importance to minority and disadvantaged groups. I hope that many of you will consider this career pathway. If you do, the CWRU MSTP will welcome your applications!

There is an important theme to this conference: It’s Crunchtime, Sustaining Momentum While Under Pressure. The last two years have brought to the forefront our nation’s historical racism and inequities. Our School of Medicine and MSTP students and faculty are actively engaged in advancing diversity, equity and inclusion in education, research, and healthcare. Importantly, we must also take care of each other and invest in our wellness, while sustaining the momentum!

We are honored to host you, and I hope you will enjoy the conference workshops, dynamic speakers, research presentations, and camaraderie.

Sincerely,

Clifford V. Harding, MD, PhD
Case Western Reserve University School of Medicine, Office of Diversity, Equity, and Inclusive Excellence (DEIE) Welcomes You!

CWRU SOM is a community where everyone can reach their full potential. We support diversity, inclusive excellence, and equitable treatment for all people to achieve success in the School of Medicine and beyond. We are committed to the learning, the teaching, and the practice of compassion for all.

Greetings Region V and Guest Attendees,

It is my pleasure to welcome you all to the 2022 Student National Medical Association (SNM) Region V Medical Education Conference (RMEC) hosted by the SNMA Chapter at Case Western Reserve University School of Medicine. We are looking forward to having you spend the weekend with us as we explore this year’s conference theme “It’s Crunch Time! Sustaining Momentum Under Pressure.” We are excited to bring you a host of workshops dedicated to medical, pre-medical, and high school student leadership and career development, and look forward to presenting you with the opportunity to network and engage with those who share similar interests as you, as well as those who are genuinely invested in your future.

As we continue to uphold the mission of SNMA and strive to increase diversity in medicine it is our hope that you will take advantage of this unique opportunity to invest in your future as an aspiring physician. It is our goal to equip you with the tools that you will need along your academic and professional journey, and to encourage you to push forward as you learn how to navigate difficult spaces as a minority in medicine.

It is truly an honor to serve as your Regional Director and to have the opportunity to work so closely with our Regional Leadership and Host Chapter to bring you such an amazing conference experience, despite the obstacles that have prevented us from meeting in person this year. I would like to personally thank our generous sponsors, exhibitors, and workshop speakers who have invested their time and funding into making this conference experience as beneficial and dynamic as possible for our students of color. We truly hope that you enjoy every moment of engaging in this unique opportunity.

Yours in SNMA,

Candace Acuff, MPH
Student National Medical Association
Region V Director, 2021-2023
M.D. Candidate, Class of 2023
Wayne State University School of Medicine
Esteemed Colleagues,

It is with great excitement and honor that we welcome all students, faculty, sponsors, and exhibitors to the 2022 SNMA Region V Medical Education Conference hosted by Case Western Reserve University School of Medicine. With the growing divide within our country and lack of representation in medicine, health disparities have been exacerbated and it is becoming increasingly apparent that our society needs a generation of highly qualified, compassionate, and diverse physicians. Our Student National Medical Association chapter and the greater Cleveland community recognize this need and are striving to achieve equity and diversity in medicine.

This year's conference theme, “It’s Crunch Time! Sustaining Momentum While Under Pressure,” was chosen by our chapter members. The current nature of our political climate and the ever-ensuing COVID-19 pandemic put pressure upon marginalized members of our community further worsening social determinants of health. Furthermore, underrepresented minority medical students are forced to balance these external pressures while pursuing a difficult medical education in a field riddled with biases and microaggressions. We are seeing a growing concern about the mental health and general well-being of our Black and Brown students, which elevates the importance of gatherings such as RMEC 2022.

A common misnomer about perseverance is that it means overcoming adversity and addressing stressful situations without without caring for one's own well-being. “Keep pushing!” we are told, without regard to our mental health. At RMEC 2022, we would like to change this concept and emphasize the whole person - body, mind, and spirit. How can one maintain momentum while facing external and internal adversity? How can one come out the other end without losing themselves, and instead grow into a more conscious, compassionate, and impactful individual? We hope that Black and Brown students learn how to be self-loving while advocating for change and acquiring the skills necessary to persevere in difficult environments where they may be in the minority. It is time for us to take back our self-identities and help each other grow into the joyful and loving individuals we were destined to be.

On behalf of CWRU SOM's Chapter of SNMA, we would like to welcome you all to Case Western Reserve University School of Medicine. We implore you to take full advantage of what is offered at this much-needed conference and we hope you consider Case Western Reserve University School of Medicine for medical school, residency at our affiliate hospitals (Cleveland Clinic, University Hospitals, and MetroHealth), undergraduate studies, and more!

Sincerely,

Mario-Cyriac Tcheukado
RMEC Committee Co-Chair
Cleveland Clinic Lerner College of Medicine

Main Events

Opening Ceremony
Saturday, October 1st • 8:00 am

Keynote Speaker
Saturday, October 1st • 6:00 pm - 8:30 pm

Closing Ceremony
Sunday, October 2nd • 12 pm

Community Service Events

School Supply Drive
This September, SNMA mission is to compile school supplies to he students/ schools need in the Cleveland area. Once the RMEC conference comes to an end, all the items that have been collected will be parsed into their designated areas, we will then carry out the items to the institutions in need of them! Monetary contribution is accepted as well, donate via Cashapp $region5treasure, and specify for "School Drive"by October 1st.

Homeless Shelter
Help provide meals to our local communities in Cleveland. Volunteers are able to meet either at Haven Home or Lutheran Metropolitan to provide food to everyone during this difficult time.

Project Sunshine
This September, SNMA has partnered with Project Sunshine, a nonprofit supporting children and families facing medical challenges by harnessing the healing power of play. Join us in a card making event to bring joy to pediatric patients!

Social Events

Social Mixer at Velvet Dog
9:00 pm - 11:00 pm
Eat and meet new people in a guided social mixer at Velvet Dog in the Flats! All the fun of an in-person social mixer, with great food and drinks!
The mission of this project is to compile a list of items the students/schools need in the Cleveland area and give monetary and/or physical supplies to meet their needs.

New items to donate:

- 3-ring binders (1½–2")
- Art paint brushes
- Children’s lap-sized whiteboards
- Compass
- Crayons
- Protractors
- Rulers
- Scissors
- Glue sticks
- Backpacks
- Scientific calculators
- USB/flash drives
- Highlighters
- Markers
- Scientific calculators

- Folders
- Notebooks
- Notebook paper
- Printer paper
- Construction paper
- Colored pencils
- No. 2 pencils
- Laddie pencils (primary grades large)
- Pencil boxes
- Markers
- Pens (blue, black and red)
- Erasers
- Face tissue
- Hand sanitizer
- Hand wipes
## Grand Round Sessions

OUR NUMBERS ARE JUST THE START.

5 top areas of groundbreaking biomedical research

- metabolism and disease
- cancer
- infection and inflammation
- cardiovascular health and disease
- neurosciences

4 world-class teaching hospitals as our partners

- Cleveland Clinic
- Louis Stokes Cleveland VA Medical Center
- Center for MetroHealth Medical Center
- University Hospitals of Cleveland Medical Center

3 distinct tracks to receiving an MD

- 4-year, MD program
- 5-year, research-focused MD program
- 8-year, MD/PhD physician-scientist program

2 sciences woven together in innovative and standard-setting curriculum

- basic science
- clinical science

1 city known for its health care and biotechnology leadership

- Cleveland

With nearly 180 years of history on the front lines of medical and educational innovation, combined with collaborative and passionate students who emerge as clinicians, scientists and leaders, Case Western Reserve University School of Medicine adds up to one of the country's best medical schools.
WORKSHOP TRACKS

General (All) Sessions:

This series of workshops is designed for all RMEC attendees. This includes:

- Grand Rounds
- Mental Health & Wellness Sessions

High School Track

The High School Student track was specifically designed by the SNMA to cater to the needs and interests of high school students interested in pursuing careers in medicine.

Pre-Medical Student Track

The Pre-Medical Student track was specifically designed by the SNMA to cater to the needs and interests of pre-medical students who include (but are not limited to) undergraduate students, post-baccalaureate students, and master program students.

Medical Students Track

The Medical Student Track is designed to provide a vast array of information to medical students of both allopathic and osteopathic medical students.

The David Satcher Clerkship hosts 5-10 medical students annually, offering hands-on clinical elective experiences and exposing students to career opportunities in academic medicine. Clerkships are four weeks, from July through November. Block times may be flexible if necessary. Students interested in applying should review the clerkship prerequisites and access the online supplemental application via the UH David Satcher Clerkship webpage.

**MISSION:**
Diversity representation in future health care leaders.
Meet the needs of underserved and underrepresented communities.

**SCHOLARS RECEIVE:**
- $2500.00 stipend to assist with travel and housing costs related to the rotation.
- Four-week clinical elective rotations are offered from July through November.
- Participate in Department clinical and scholarly activities as an active team member.
- Assigned faculty advisor, community advisor, and ample opportunities to network with UH faculty, residents, and staff.
- Opportunity to meet with Residency Program Director for elective chosen.

**ELIGIBILITY**
- Fourth-year students from groups underrepresented in medicine, specifically; Black/African-American, Hispanic/Latino, Native American/Alaska Native, and Pacific Islander/Native Hawaiian.
- In good academic standing.
- Completed core clinical clerkships.
- Home school approval to participate in the desired elective at University Hospitals.
- Completed USMLE Step 1 before the start of the rotation.
- Medical students in LCME accredited medical school outside of Northeast Ohio.

**HOW TO APPLY**
- Complete the David Satcher online supplemental application on the UH David Satcher program webpage; [https://cutt.ly/SatcherClerk](https://cutt.ly/SatcherClerk).

Region V Medical Education Conference Banquet

Saturday, October 1, 2022
Linsalata Alumni Center
11310 Juniper Rd., Cleveland, OH 44106
6 pm sharp

Join us for our closing ceremony during the regional medical education conference banquet.
Keynote address by
Case Western Reserve University Alumnus,
Dr. Michael Knight.
Admission cost is included in conference registration.

Dress to impress!
On behalf of SNMA Region V, I would like to take the time to thank the SNMA Region Executive Board and the Case Western Reserve University School of Medicine Committee for their hard work and commitment to the 2022 Region V Medical Education Conference (RMEC).

The Region V Executive Board and the Case Western Reserve University School of Medicine Committee were motivated to create a well-organized, creative, and enlightening conference this year. All members showed their valuable leadership skills to help create an amazing conference for our attendees, sponsors, and exhibitors.

Once again, we are truly appreciative of your service and continued commitment to SNMA's vision.

Sincerely,

Adefolarin Alade
Assistant Regional Director
Region V SNMA
