Army Navy Country Club
Arlington, VA.

Nominated By: Tennis Courts Inc.
Specialty Contractor: Tennis Courts Inc.
Suppliers: Har-Tru Sports, LSI Industries, Edwards
Courts: 14 soft, 4 hard
Completed: September 2014
The new tennis facility at the Army Navy Country Club includes 14 Har-Tru courts with subsurface irrigation (10 with lights) and four new asphalt tennis courts, along with cabanas, fencing and windscreens. The project was challenging due to wet weather during construction and limited access space for construction materials. In one instance, an existing wall next to one battery of courts failed, destroying the fence line, hydro court cells, sleeves and light-pole foundations. The solution was to add extra stone to help with compaction and counteract the wet conditions. The wall was changed from poured concrete to a stacked block wall, and the light-pole footers were redesigned by an engineer.

GERARD FILION
SECONDARY SCHOOL
LONGUEUIL, QUEBEC, CANADA

Nominated By: Carpell Surfaces
Architect/Engineer: DSSS Ltd.
Surface: Carpell Surfaces Inc.
Suppliers: Stockmeier Inc., Mapei Canada, Sportsfield Specialities
Completed: November 2015
The new running track at the Gerard Filion Secondary School in Quebec was designed to meet IAAF Class 1 standards. The project included the asphalt base and a top-quality, eco-friendly, poured-in-place polyurethane surface. The polyurethane “sandwich” system was applied in four stages and required a perfectly level asphalt base and highly precise measurements for the thickness of the layers. Unprecedented cold weather created some delays in product drying times, but the construction team was able to adjust the schedule to complete the project on time.
Banta Bowl
Lawrence University
Appleton, Wis.

Nominated By:
Rettler Corp.

Architect/Engineer:
Rettler Corp.

Suppliers:
Sportsfield Specialities, Fieldturf-Tarkett

Completed:
December 2015
OUTSTANDING SINGLE-FIELD FACILITY OF THE YEAR

This renovation and reconstruction of the Lawrence University Banta Bowl sports stadium involved installing an expanded synthetic turf field to accommodate soccer and football, along with the demolition of existing support buildings and construction of a new concessions/restroom/locker room building, grandstand seating, new scoreboard and more. The reconstructed field was developed to meet competitive guidelines and requirements of the NFHS and NCAA. Among the obstacles the contractor had to contend with were an inadequate field width, stemming from when the stadium was originally constructed in 1965, and accommodating storm sewer and sanitary sewer facilities that crossed under the stadium field.

SHORELINE ATHLETIC FACILITY
MOUNTAIN VIEW, CALIF.

Nominated By: Siegfried Engineering
Architect/Engineer: Siegfried Engineering
Surface: Astroturf
Suppliers: Brock, Hunter, Sports-field Specialties, UCS
Completed: November 2015
OUTSTANDING MULTI-FIELD FACILITY OF THE YEAR

The new 10-acre Shoreline Athletic Facility is built on a closed landfill site and now provides multi-use synthetic turf fields for soccer, baseball, softball and lacrosse. From design through construction, the process took five years, which included more than a year of overburdening the site with more than 120,000 cubic yards of soil to accelerate settlement. There also were many regulator landfill permit requirements to deal with, including modifying the existing landfill gas extraction system. Design and construction also had to accommodate the western burrowing owl, a protected species that used a part of the site as a foraging habitat. The result, though, is a recreational space that is completely flexible for end users, whether children or adults.
GLADWYNE RESIDENCE
GLADWYNE, PA.

Nominated By: Pro-Sport Construction Inc.
General Contractor: Pro-Sport Construction Inc.
Suppliers: California Sports Surfaces, Tech-Con, Aer-Flo, Har-Tru Sports, Techlight
Surface: Plexipave
Completed: August 2015
OUTSTANDING RESIDENTIAL TENNIS FACILITY OF THE YEAR

The new residential court in Gladwyne, Pa., with LED lighting, was a coordinated effort that, in addition to a court contractor, included masons, excavators, electricians, landscapers and more.

Set among steep slopes, the site had limited access for construction vehicles and materials. The concrete for the post-tensioned slab, for instance, had to be pumped over 360 feet up a steep hill, and the concrete for the custom stone retaining walls had to be mixed on-site. The custom fencing of clear cedar posts and rails with mortise-and-tenon construction also was built on-site. A pre-cast channel drain was installed on the court, while yard drains were installed to catch perimeter water run-off, all of which attaches to a storm-water management system constructed under the court.

ASBA • • • 2016
The new Virtue Field House at Middlebury College was designed to be a flexible space, suitable for training and competition, yet also be able to hold up to 5,000 people for large campus functions and assemblies. The field house replaces a “bubble” that was an athletics-only facility that housed an indoor competition track and floor space for field events. The new facility incorporates a 200-meter indoor track, synthetic turf practice space, expanded recreation space and improved spectator accommodations. The design team aimed to create a facility that visually and functionally departs from the limitations of traditional buildings of this type, leaving Middlebury flexible and well-positioned to be able to host regional and NCAA indoor track and field events for the first time.
FROM THE ASBA CHAIRMAN

OUR WINNERS ‘BUILD IT RIGHT’

On behalf of the American Sports Builders Association, I would like to congratulate the 2016 Outstanding Facilities of the Year Award winners and the team effort that these projects represent. The ASBA Awards Program has the goal of promoting the highest standards of construction excellence.

Since 1996, ASBA has been honoring the award winners and recognizing their outstanding construction projects at the December Technical Meeting, our annual gathering. A complete listing of this year’s winners of awards, along with the winners from the past three years, can be found on ASBA’s website at www.sportsbuilders.org.

ASBA’s theme—“Build it Right”—is exemplified by the ASBA Awards Program. Each project represents a team effort between designers, builders and suppliers who have collaborated to produce the highest quality in sports construction. ASBA’s programs are built around educating the professionals in our industry, and providing networking and collaboration opportunities for our members. The strong partnerships that exist within ASBA among its builders, designers and suppliers are at the heart of this success.

Any ASBA members contributing to the design and/or construction of an outstanding project or facility are encouraged to submit an application for one of several industry awards.

Congratulations to this year’s award winners and thank you for continuing to set examples for others to follow.

Pete Smith, CTCB
Chairman
American Sports Builders Association

About the ASBA

The nonprofit American Sports Builders Association (ASBA) is a national organization for builders, designers and suppliers of materials for tennis courts, running tracks, synthetic turf fields, and indoor and outdoor synthetic sports surfaces.

The ASBA works to raise professional standards and ensure that consumers receive services of the highest quality. As part of its work to achieve this goal, the Association sponsors a certification program that permits experienced tennis court, running track and sports field builders to demonstrate their competency by completing an examination on all areas of construction.

Looking for a Design or Construction Professional?

With just a quick click, you can find exactly what you’re looking for at the American Sports Builders Association website, www.sportsbuilders.org. Use our online directory to find a business in your area with the skills or supplies you need.

On the left side of the homepage, select “Find a Builder/Designer/Supplier.” That link will allow you to sort by company name, state, product name and more. You’ll find full contact information, including address, phone and fax numbers, e-mail, web addresses and company personnel.
