Program Directors and Associate Program Directors:

I hope this email finds you healthy and safe.

In an effort to keep us connected with respect to our trainees, I write to provide you with recent education opportunities.

The AAO-HNS/F has approved **FREE** access to AcademyU - Home Study Course+ catalog through August 30, 2020. This catalog includes a robust library of self-paced learning activities. Many are case-based to simulate real-life clinical decision making. Many of your residents are currently subscribed to the AAO-HNSF 2019-2020 Home Study Course+ (HSC+) and already have access. If your residents are not currently subscribed, please send a list of names and email addresses to hsc@entnet.org by Friday, April 3rd.

The California programs have organized a fantastic online education opportunity: Multi-Institutional Otolaryngology Residency Education - Collaborative Online Video Instruction and Discussion (COVID). This program is available to all residents and offered M-F at 4-6pm PDT. Details are posted on the AAO-HNS ENTConnect Otolaryngology Program Directors Organization community. Our colleagues are developing East Coast (Brett Comer and Nikita Gupta) and Mid West (Sarah Mowry and Marc Thorne) versions intended to cover all time zones and to offer morning and afternoon options. Stay tuned...more information will be forthcoming. Please volunteer for a lecture and invite your faculty to do the same.

Finally, I want to encourage all of you to join and engage on ENTConnect. We are all facing similar challenges with respect to our trainees and their education; this forum allows us to communicate, support and learn from each other. If you are not a member in the OPDO community or unable to receive messages, email Craig Wanda (cwanda@entnet.org) to join and/or activate your account.

Be safe and well, we are all in this together!

Sonya
