

CatesbyTunnel
Open Day
and Networking
Event

2024

1 October 2024

CATESBY
— TUNNEL —

We invite you to join us at Catesby Tunnel for an Open Day and Networking Event on Tuesday 1st October 2024.

The sessions will involve an introductory presentation, a tour of Catesby Tunnel and a live demonstration run. The structured part of each section will last approximately 1.5hrs. However, afterwards you are welcome to spend as long as you want viewing exhibitors and networking.

To confirm your attendance and pick a time slot, please click the link below and complete the form:

[REGISTER](#)

Once you have submitted the form please expect a reply from one of our staff within 3 working days.

More information regarding exhibitors, guest speakers and tunnel demonstrations will follow in due course.

Exhibitors

Bramble

Bramble's in the cloud CFD Platform speeds up the pre and post-simulation process, giving you more time to innovate. The user-friendly platform and customised data management opens up CFD simulation to all levels of expertise, whilst its inbuilt methodology gives you results you can trust.

Catesby Projects

Engineering and design consultancy, specialising in aerodynamics. Their engineers have worked behind the scenes to deliver world class solutions to championship winning race teams, Olympic champions and automotive OEMs. They are also the official resellers of Catesby Tunnel.

Dash - CAE

A pioneer in additive manufacturing and robotics, at its heart Dash-CAE is a trusted innovative engineering company that excels when tasked to think creatively. With one-stop capabilities to provide a rapid response for high end vehicle projects, Dash-CAE combine engineering design with the latest composites, robotics and additive manufacturing technology.

Evolution Measurement

Provider of physical and consultative solutions to measurement problems. Evolution Measurement cover pressure, temperature and resistance measurement, providing a range of instruments.

FORD Heritage

Stashed away at their new home in Daventry, Ford's Heritage collection boasts 120 years of Ford history. We are lucky enough to be welcoming several vehicles from the collection to take part in live demonstration runs in Catesby Tunnel for this event.

Exhibitors

INTREPID Control Systems

Intrepid Control Systems are a global leader in vehicle networking, testing, and embedded engineering tools. Based at MIRA Technology Park, Intrepid UK have a comprehensive suite of hardware and software tools used for applications like vehicle network interfacing, data logging and more.

JRM

JRM are a UK advanced engineering and manufacturing business based in Northamptonshire. An agile team that are particularly strong in vehicle build, conversions and system integration.

Kistler

Global leaders in providing modular solutions in dynamic measurement technology for pressure, force, torque and acceleration applications. Customers in industry and scientific research benefit from Kistler's experience as a development partner, enabling them to optimise their products and processes so as to secure sustainable competitive edge.

Racelogic

Racelogic are experts in positioning, data logging and video, serving some of the biggest names in the automotive and motorsport industries. Racelogic have also developed a custom speed measurement system for enclosed vehicles testing in Catesby Tunnel.

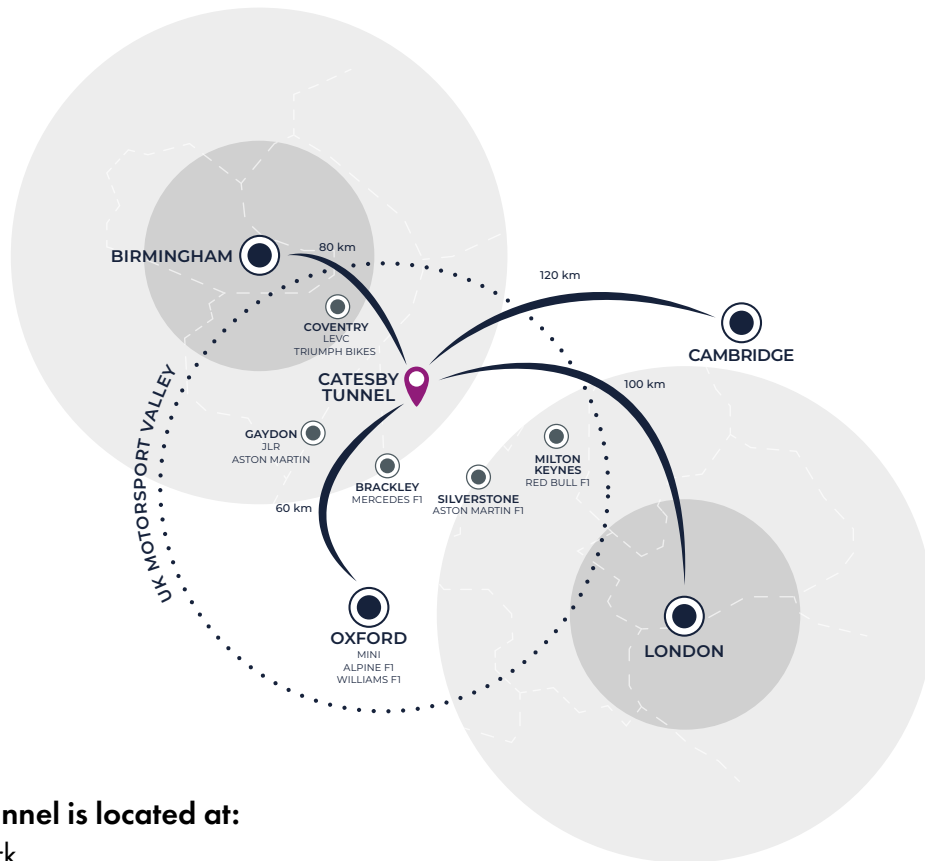

SIEMENS

An international brand, that was established in the UK over 170 years ago. Siemens is a technology company focused on industry, infrastructure, transport, and healthcare.
