

No Stopping Collaboration

The Key to Our Future

Definitions

Collaboration is working together to create something new in support of a shared vision. The key points are that it is not through individual effort, something new is created, and that the glue is the shared vision.

Coordination is sharing information and resources so that each party can accomplish their part in support of a mutual objective. It is about teamwork in implementation. Not creating something new.

Cooperation is important in networks where individuals exchange relevant information and resources in support of each other's goals, rather than a shared goal. Something new may be achieved as a result, but it arises from the individual, not from a collective team effort.

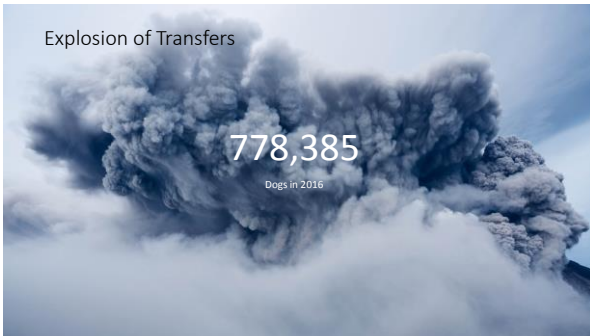

Tremendous Progress

Intake is Declining

Explosion of Transfers

Challenging a Traditional View

Skyrocketing Cost of Sheltering

Getting Under One Roof

Australia consolidated all of the animal welfare groups under a single organization

British Columbia has built a large organization that has consolidated over 50 organizations

Humane, animal control and wildlife being brought under one roof

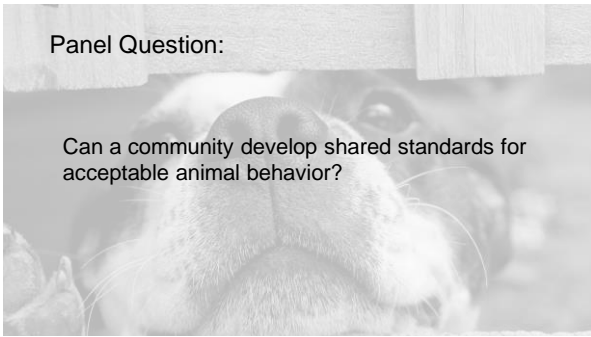

Panel Question:

Is going it alone too expensive?

and/or

Is messaging from so many individual agencies impacting the total amount of money that could be raised for the cause?

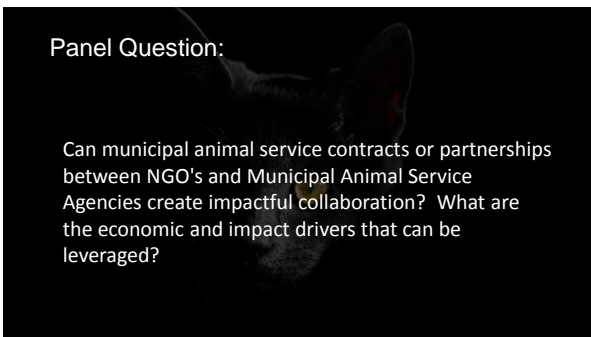

Panel Question:

Can a community develop shared standards for acceptable animal behavior?

Panel Question:

Can or should regional collaboration lead to joint strategic planning?

Panel Question:

Can municipal animal service contracts or partnerships between NGO's and Municipal Animal Service Agencies create impactful collaboration? What are the economic and impact drivers that can be leveraged?
