

The Graphene Council

Research, Development and Application

University Membership and Tech Transfer Offices

University Membership provides an unlimited number of **Academic Membership** level subscriptions for employees and valuable benefits for your institution;

IP Transfer and Market Development

The Graphene Council works to promote and support the development of a viable market for graphene and related materials.

This includes collecting market information and intelligence, developing promotional communications to inform market participants and providing information to graphene application and solution developers that will help them identify potential markets and attract investors.

We can also raise awareness for your programs and developments, helping to attract commercial partners and investors.

Market Intelligence

Your organization will receive a copy of the **2018 Bulk Graphene Pricing Report**, a \$1,900 value! (This market report is available exclusively from The Graphene Council).

- Understand which markets are the best candidates
- Discover current market price points for different forms of graphene materials
- Learn what price points will be needed for graphene to compete effectively with existing materials in targeted markets
- Provides up-to-date, market based intelligence

In addition, you will receive regular **'Members Only' weekly updates** on graphene research, journal articles, developments in commercial applications, patents, events and career opportunities, world-wide.

University Membership Dues are only USD 2,750 per annum per institution.

The Graphene Council provides **membership options** for students, academics, professionals, companies and universities.
