ONTARIO'S AEROSPACE INDUSTRY **IS A WORLD LEADER** IN SEVERAL AREAS INCLUDING:

aerostructures
avionics and electronic systems
turboprop aircraft
business jets
turbine engines
environmental systems
landing gear systems
UAV systems and payloads
space robotics.

ONTARIO IS A GLOBAL CENTRE FOR ADVANCED MANUFACTURING EXPERTISE, with a long history of meeting the most demanding specifications for high-quality aerospace parts and services.

OVER HALF OF THE WORLD'S TOP 25 AEROSPACE COMPANIES HAVE KEY OPERATIONS IN ONTARIO.

BURLOAK
TECHNOLOGIES INC.

www.burloaktech.com

Peter Adams
President
peter.adams@burloaktech.com
+1 905 815-7209

Burloak Technologies is a leading supplier of additive manufacturing solutions for aerospace. AS9100D, ISO9001:2008, CCGP and ITAR compliant.

Burloak offers AM capabilities available on a contract manufacturing basis and we are expanding by opening a new Additive Manufacturing Centre of Excellence in Oakville, Ontario.

Key technologies– LPBF, EBEAM, EBAM, DED, Binder Jet, SLS, FDM. We offer a wide range of aerospace materials: titanium, aluminum, inconel, hastelloy, invar 36, cobalt chrome and stainless 316L. Burloak offers extensive post process capabilities, heat treatment, CNC machining, deburring, polishing, laboratory testing and inspection services.

Burloak can guide customers through all aspects of design for additive (DFAM).

COMPOSITE
AUTOMATION

www.compositeautomation.com

Peter Richter
Vice President Marketing and Sales
peter@compositeautomation.com
+1 519 654-6136

Composite Automation represents leading automation experts that specialize in composite manufacturing solutions. Our team has decades of composites and automation experience, which enable us to understand and meet our customers' needs by providing them with the best composite manufacturing solutions.

The products we represent include; carbon material and part management systems; fibre placement; tape placement; fibre patch placement; cutting tables; filament winding machines; slitters and rewinders; hot press vacuum tables; integrated systems and tooling and release materials.

The companies we represent include: Mikrosam, Cevotec, JETCAM, Autometrix, ONExia, IMC, and Movitherm. Our team can provide off the shelf and custom composite manufacturing solutions for material management, material processing, composite parts manufacturing and quality and inspection.

COORDINATE
INDUSTRIES LIMITED

www.coordinate-industries.com

Derek Truba
Vice President
truba@coordinate-industries.com
+1 905 510-4250

For over 30 years, Coordinate Industries Ltd. has been respected as a value-added supplier of high quality precision machined parts for the aerospace, military and medical industries.

We also manufacture mechanical components for the spectral imaging and visual information industries.

Established in 1985 as a privately-owned company, Coordinate Industries is committed to providing cost effective, technologically advanced, parts manufacturing solutions to our clients. Exporting worldwide since 2010, our services include parts finishing, processing and assembly.

Our highly skilled personnel and engineering staff are dedicated to delivering superior products, exceeding quality and delivery expectations.

Coordinate Industries Ltd.
Your Precision Machining Partner

CYCLONE
MFG INC.

www.cyclonemfg.com

Daniel Dobrjanski
Vice President, Business Development
daniel.dobrjanski@cyclonemfg.com
1+ 647 986-2251

Cyclone Manufacturing is a vertically integrated full service provider of 3-5 axis machining, sheet metal fabrication, tube bending, welding and minor sub-assemblies of aerospace structural components to the largest aerospace companies such as Boeing, AIDC, Bombardier, Embraer, FACC, GE, IAI, Liebherr, Lockheed Marting, MHI, SAAB, Stelia, Spirit AeroSystems and Triumph Aerostructures.

Our surface treatment and controlled processes are approved by the major OEMs such as Airbus, Boeing, Bombardier, Embraer, IAI and Lockheed Martin. Cyclone Manufacturing is a privately owned company with over 750 highly skilled employees housed within five state-of-the-art facilities totaling 500,000 square feet in both Canada and Poland.

CYCLONE MANUFACTURING INC.

FIRAN TECHNOLOGY GROUP CORPORATION

www.ftgcorp.com

Peter Dimopoulos
Vice President, Business Development
peter@ftgcorp.com
+1 416 220-8353

FTG is a global corporation offering design, development and manufacturing solutions for aerospace and defense electronic products and subsystems.

With its technological insight, FTG offers innovative engineered solutions, diverse manufacturing capabilities and product life-cycle support through its facilities in the United States, Canada and China.

FTG Circuits is a manufacturer of high-technology, high-reliability printed circuit boards for HDI, RF, thermal management, rigid flex and flex applications.

FTG Aerospace designs and manufactures high-reliability, illuminated switch panels, keyboards, MCDU's, bezels, box-level assemblies (LRU's) and simulation products.

GARRTECH
AEROSPACE INC.

www.garrtech.com

Marshall Warren
Director of Business Development
marshall_warren@garrtech.com
+1 905 906-1637

Garrtech has provided expertise in advanced precision manufacturing and product design since 1991. We provide manufacturing, engineering and inspection services for single parts to full production runs, including complex assemblies.

Our methodology focuses on quality (AS9100D) and on-time delivery. Garrtech's modern machinery is reinforced with an experienced workforce along with dedicated program managers. Garrtech's capabilities continue to improve fabrication of complex 3, 4 and 5 multi-axis components. We are developing proprietary metal 3D printing in a state-of-the-art climate-controlled facility.

GARRTECH Inc.

GASTOPS
LTD.

www.gastops.com

Steve Rodger
Director of Products
srodger@gastops.com
+1 613 899-2394

Gastops is recognized worldwide for innovative solutions improving the effectiveness of operating and maintaining critical equipment.

For over 35 years, our solutions have been used in defense, aerospace, energy and marine applications to optimize the availability, readiness, maintenance, performance and safety of complex rotating equipment.

Gastops' products and services add value throughout the life cycle of complex rotating equipment from the design stage through to in-service operations and support.

KOSS
AEROSPACE

www.kossaerospace.com

Alex Cajic
Vice President, Business Development
Business Development
alex.cajic@kossaerospace.com
+1 905 949-9052

Koss Aerospace is a Tier 1 manufacturer of structural aircraft components and assemblies, with over 40 years of experience serving commercial aerospace and defense customers worldwide.

We are recognized for our expertise in high speed machining. Utilizing state-of-the-art technology, our machining capabilities range from small simple 3- Axis components to large complex 5-Axis components up to 10 feet in length.

In 1992, we opened our own NADCAP approved processing facility (Brampton Processing), which offers complete metal finishing services. This enables us to be vertically integrated from manufacturing to processing to complete assembly resulting in a seamless integration of functions.

Koss Aerospace

LIFTSAFE FALL PROTECTION INC.

www.fallsafetysolutions.com

Claude Leduc
Aviation Support Specialist
claude@liftsafegroup.com
+1 226 791-9284

At Liftsafe Fall Protection, we design, engineer and fabricate custom aircraft access stands and GSE (Ground Support Equipment).

Working with our customers, our products are engineered for specific aircraft operations to provide safety compliant access as well as fall protection services.

Through rigorous product testing, we have refined our products to perform under all operating scenarios. All of our equipment meets and exceeds all major international standards for both safety and quality.

Liftsafe Fall Protection's ideal buyers would be airlines, MRO's and manufacturing companies. Some examples of our current buyers include: Air Canada, American Airlines, Delta Airlines and Boeing on both Rolls Royce and GE engines.

MDS AERO
SUPPORT CORPORATION

www.mdsaero.com

Joe Hajjar
Vice President, Business Development
joe.hajjar@mdsaero.com
+1 613 408 3883

For more than 30 years, MDS has been the global leader in gas turbine engine solutions— our clients include Rolls-Royce, Pratt & Whitney, General Electric, Siemens, Solar Turbines, Lockheed Martin, MTU, Snecma Aircraft Engines and Air France.

Specializing in providing aviation, industrial and marine solutions for the world's top companies with projects in more than 20 countries, MDS delivers customized, turnkey gas turbine engine test facilities as a prime partner to its clients.

GAS TURBINE ENGINE SOLUTIONS

SHIMCO
(SHIMCO NORTH AMERICA INC.)

www.shimco.com

Peter Voss
President and Chief Executive Officer
pvoss@shimco.com
+1 647 618-1974

Shimco is an award-winning, world-leader in the manufacture of high-precision standard and custom aerospace-grade shims, shim materials, machined parts and patented technologies for diagnostic and prognostic health monitoring for the OEM, Tier 1 and MRO aerospace, space and defense markets.

Shimco is the #1 aerospace shim supplier in Canada and Latin America. A majority of the world's aerospace OEMs and Tier 1 suppliers buy from Shimco. Shimco is ISO 2008:AS9100D certified and Canadian Controlled Goods registered.

Shimco has won many awards for its products and services, including the Markham Board of Trade Business Excellence Award in 'Innovation', the Cambridge Chamber of Commerce's 'New Venture of the Year' and Bell Helicopter's 'Premier Supplier Award'.

Our focus is on 100% quality and 100% on-time-delivery, at competitive prices, to every customer we serve in the world.

SHIMCO
AEROSPACE DEFENSE INDUSTRIAL

SKYX
SYSTEMS

www.skyx.com

Scott Simmie
Communications
scott.s@skyx.com
+1 416 705-9100

SkyX is a Toronto company that builds autonomous vehicles for long-range asset monitoring and data acquisition.

Its SkyOne VTOL UAV flew 100+ kilometres over a gas pipeline in Mexico in a single flight, programmed and initiated from SkyX headquarters 3,000 kilometres away.

The SkyX System includes “xStations” for remote recharging and range extension, and the SkyX OS for monitoring real-time mission status. Together, the SkyX System provides seamless and integrated monitoring as a service.

SKYX
Take Charge.

TRACKGEN
SOLUTIONS INC.

www.trackgen.com

Thia Kirubarajan
Director
kiruba@trackgen.com
+1 416 823-2144

TrackGen is a software and consulting company with a multisensor-multitarget tracking suite that offers a comprehensive solution for surveillance, safety and security, search and rescue and transportation applications in air, space, ground, maritime and underwater scenarios.

They are not only into developing novel algorithms and publishing them, but they also work with real-world tracking problems and transition them to fielded systems.

They have worked with a multitude sensors (e.g., radar, sonar, video, EO/IR, AIS/ADS-B, ESA and multistatic) and scenarios (air, space, ground, maritime and underwater) with application to surveillance, safety & security, search & rescue, air traffic control, ground transportation, shipping, video tracking, crowd monitoring and bio-medical systems.

ONTARIO CANADA

THE ONTARIO AEROSPACE COUNCIL

www.theOAC.ca

Moira Harvey
Executive Director
+1 647 274-5533
moira.harvey@theOAC.ca

The Ontario Aerospace Council (OAC), a not-for-profit organization, is comprised of 200 member companies, representing over 70% of the Ontario aerospace industry employment base and spans all tiers, business activities and sizes. Ontario-made aerospace parts from this technology-intensive diversified cluster are used on virtually every passenger aircraft in the world.

OAC fosters relationships between all stakeholders: industry, academia, researchers, governments and associations to gather and share industry intelligence, identify and facilitate funding as well as being an active catalyst for industry growth. Our purpose is to enhance recognition of Ontario's capabilities as a leader in global aerospace markets and work together to build greater expertise to assure continued growth and prosperity.
