Garrtech Inc. and Mitsubishi Heavy Industries Canada sign a five-year manufacturing agreement for various airframe components.

Garrtech Inc. (LOGTO) an AS9100 certified leader in precision machine components for the aircraft, defense, nuclear and commercial industries, is pleased to announce the signing of a multi-year agreement for numerous airframe and fuselage components with Mitsubishi Heavy Industries Canada (MHICA).

The partnership with Mitsubishi Heavy Industries Canada Aerospace (MHICA) aligns with Garrtech's strategic business goals to expand their expertise in manufacturing precision machined parts. This agreement allows Garrtech to add skilled manufacturing jobs while exploring new capital expenditures.

Mitsubishi Heavy Industries Canada Aerospace (MHICA) is a Group Company of Mitsubishi Heavy Industries (MHI) headquartered in Tokyo, Japan.

MHICA is a Tier 1 Wing and Fuselage manufacturer of heavy aerospace structures and assemblies based in Mississauga, Ontario. MHICA performs complete sub-assembly, major assembly, systems (fuel, hydraulic, electric) installation and functional tests on wings and fuselages. MHICA has Product Definition, Quality, Supply Chain, Finance, Project Management and Logistics capabilities.
