On-Line Registration is Now Available!

TITANIUM 2003
Conference & Exhibition

The 19th Annual Titanium Conference & Exhibition will be held October 12-14, 2003 at the Monterey Convention Center and DoubleTree Hotel at Fisherman’s Wharf in Monterey, California.

The exhibition is sold out!
The general session has been finalized.
Now all we need is your attendance!

It’s time for you to register for the conference by faxing your registration to the ITA at 303-404-9111 or by visiting the conference section of the ITA web site at www.titanium.org for on-line registration.

The DoubleTree room block rates are valid until either the room block is sold out or before September 26, 2003. Please contact the DoubleTree at 831-649-4511 to make your hotel reservation and to guarantee the discounted room rate of $176.

Remember: the ITA Golf Classic will be held at the beautiful Bayonet/Black Horse Golf Course on Sunday, October 12th. The tournament is limited to the first 100 players and registrations are filling rapidly. Register today to avoid any regrets!

Schutz To Be Honored With The Nace International Frank Newman Speller Award At Corrosion/2003

Houston, TX, U.S.A. February 2003—NACE International will honor Ronald W. Schutz with the prestigious Frank Newman Speller Award on March 16th at CORROSION/2003, the organization’s 58th annual conference to be held in San Diego, California. Each year the NACE Speller Award recognizes significant contributions to corrosion engineering. Recipients of this award have made an international contribution through education or work promoting development or improvement of a method, process, and type of equipment, or material that facilitates control of corrosion or makes the process more economical.

Ronald W. Schutz is recognized for his outstanding pioneering work in the development of corrosion resistant metallic materials for use in industrial applications and for the development of test methods and guidelines for their use. Mr. Schutz, corporate specialist in industrial technology for RMI Titanium Company of Niles, Ohio, has worked in the titanium industry for over 27 years and is recognized as a world leader in his field including research and development of titanium alloys. His specializations include defining the corrosion behavior of titanium and its alloys, developing practical corrosion limits and guidelines for titanium alloy use, establishing corrosion test methods/guidelines for
Titanium 2003: Conference

Titanium 2003: General Session

The general session provides a business/technical forum for discussion which integrates all aspects of the expanding titanium industry. This year’s conference will address material developments in the titanium marketplace, applications and technology, and will be comprised of speakers on the forefront of the industry. Panels include:

World Titanium Industry Trends
The World Trends panel provides an executive market survey from some of the leading producers in the industry. Panel speakers include: Timothy G. Rupert, President & CEO of RTI International Metals Inc., J. Landis Martin, Chairman & CEO of TIMET, and Thomas E. Williams Jr., President of Allvac, an Allegheny Technologies Company.

Corrosion/Marine Applications & Chemical Processing
Why are marine engineers turning to titanium for corrosion resistance? It helps ships come in with lower costs and better performance. Titanium is the ultimate solution to the problems that traditionally plague seawater tubing and piping. Titanium’s natural corrosion resistance can give virtually unlimited lifespan to chemical processing plants in equipment subject to aggressive acids, salt solutions, alkalis and waters. This panel of leading experts will present vital information for all professionals dedicated to corrosion research.

Consumer Products
From automotive exhaust systems and springs to architectural applications, to titanium jewelry and art. The use of titanium in major consumer markets has risen dramatically over the past decade and continues to grow at a substantial rate. This panel will discuss new emerging markets in consumer products using titanium.

Medical Applications
Titanium’s biocompatibility with the human body is head and shoulders above other materials. Because titanium is absolutely inert in the human body, immune to attack from bodily fluids, compatible with bone growth, and strong and flexible, titanium is the most biocompatible of all metals. With the significant benefits titanium offers patients, surgeons and engineers, the use of titanium will play a key role in future medical applications. This panel will examine some of the most current technologies in the titanium medical applications field.

Aerospace & Military Applications
When the titanium industry was first established in the early 1950s it was as a result of the recognition by the military, in both the West and former Soviet Union, that higher performance engines and airframes necessitated use of this higher strength to density metal. This position has not changed. Titanium use has increased with every generation of military aircraft. This panel of experts will provide an overview of titanium usage in military and commercial airline applications.

Other panels include: Distribution, Recycling, Emerging Technologies, Industrial Applications, and Welding.

Call for Papers Extended
ITA has extended the “Call For Papers” date until March 31, 2003. Promote your knowledge by presenting a paper at the upcoming 19th Annual Titanium Conference on October 12-14, 2003 in Monterey, California.

Topics Needed include:
- Aerospace
- Chemical Processing
- Consumer Products
- Emerging Technologies
- Distribution
- Industrial Applications
- Corrosion/Marine
- Medical
- Military
- Recycling
- Welding
- Other

To obtain the “Call For Papers” form contact ITA at (303) 404-2221 or email your abstract or topic of interest to sjorgensen@titanium.org.

Titanium Achievement Awards
Attention ITA Members:

Now is the time to start thinking about nominations for consideration for the 2003 Titanium Achievement Award. Nomination forms can be found on the ITA website at www.titanium.org. Click on the conference icon and select Titanium Achievement Award icon.

Referral Program
ITA Members may view inquiries received by the Association each week by clicking on the referral report found on the “Members Only” section of the ITA website. Need a password—call or email Stacey Jorgensen at sjorgensen@titanium.org.
Titanium 2003: Exhibition

ITA Exhibition Sold Out!

Thirty-six of the world’s top suppliers and manufacturers will display the latest products and technologies at the exclusive ITA Exhibition. The exhibit hall is an excellent opportunity for delegates to gather and network. It also hosts many of the ITA functions and other events such as breaks, luncheons and receptions. This year the exhibition will be held adjacent to the General Session in the Monterey Conference Center. Don’t miss this excellent networking opportunity!

2003 Exhibition Floor Plan
Monterey, California

Visit the conference section of the ITA website at www.titanium.org for complete exhibition details.
Titanium 2003: Conference Activities

Did You Know?
Fisherman's Wharf is simply footsteps away from the Doubletree Hotel. Today the old warehouses and fish-packing sheds house small shops, clam chowder joints, and elegant restaurants. The Wharf's end is an embarking point for fishing charters, whale watching boats, shopping, and sightseeing craft.

Reserve Private Meeting Space In Monterey

The number one reason people come to the conference and exhibition is for the networking and business opportunities. As a result, meeting space is at a premium. To assist our attendees in maximizing their opportunities, ITA announces private meeting space which is available by contacting the Doubletree Hotel. These rooms are ideal for companies looking for a secluded place, where they can create a corporate identity in which to entertain or meet with clients in a completely private and self-contained environment.

For more information on reserving a private meeting room, contact Stacey Jorgensen at sjorgensen@titanium.org or call (303) 404-9400.

CONFERENCE ACTIVITIES

Sightseeing Tour Options:

Two sightseeing tours will be offered at the Conference & Exhibition. Take time to discover Monterey.

Carmel Valley Wine Tasting
On Sunday, October 12th and Wednesday, October 15th sign up for the Carmel Valley Wine Tasting. Monterey County now has more vineyard acres planted than Napa County, which means more Monterey County wines to try. Sample the award winning wines of the Central Coast and visit the tasting rooms of some of the most popular local winemakers including Chateau Julien, Ventana Vineyards, Durney, and Bernardus.

Cannery Row / 17 Mile Drive / Carmel Tour
Monday, October 13th sign up for the Cannery Row, 17 Mile Drive and Carmel tour. Begin on Cannery Row and continue to the Pacific Grove (Butterfly Town USA) coastline and onto the 17 Mile Drive. You will visit Bird Rock, home to many shoreline birds as well as offshore herds of sea lions, leopard seals, and harbor seals. The tour will then continue into Carmel, going first to the Carmel Mission Basilica. After touring the Mission, you will continue into Carmel-by-the-Sea, a quaint European-like village in which you may have time to explore on your own.

For costs and detailed information on the available tours please visit the sightseeing tour section of the ITA website at www.titanium.org. All tours are handled as a first come first serve basis.

9th Annual Golf Classic:
The 9th Annual Golf Classic will begin at 8:30 am at the Bayonet Course of the Bayonet/Black Horse Golf Course on Sunday, October 12, 2003. The cost per golfer is $165 and includes: greens fees, lunch, and transportation.

This event is limited to the first 100 golfers and is handled on a first come first serve. For detailed information on golf please visit the golf section of the ITA website at www.titanium.org.
19th ANNUAL TITANIUM CONFERENCE REGISTRATION
Monterey, California October 12 - 14, 2003

Pre-Registration Cut-Off: September 12, 2003
One registration form per couple. Please Type or Print in Black Ink Only.
Your receipt and attendance confirmation will be mailed to you once the ITA has processed your registration.

Today’s Date: ____________________________

First Name: ____________________________
Last Name: _____________________________

City: ____________________________ State: ________ Zip: ____________ Country: __________________________

Telephone: ____________________________ Facsimile: __________________________

REGISTRATION FEES: Conference Registration includes: All scheduled ITA functions, entrance to Exhibition, Breakfast, Lunch, and all sponsored receptions. Attendees will also be mailed Conference Proceedings. Spouse registration includes entrance to evening receptions, and gala event on Tuesday evening.

Before September 12th:
- $595 ITA Members
- $795 Non-Members
- $295 Academic
- $150 Spouse

After September 12th:
- $795 ITA Members
- $995 Non-Members
- $295 Academic
- $150 Spouse

*Academic is any individual currently employed full time by an education institution. (Must include a valid copy of employee ID with registration).

REGISTRATION FEES: Conference Registration includes: All scheduled ITA functions, entrance to Exhibition, Breakfast, Lunch, and all sponsored receptions. Attendees will also be mailed Conference Proceedings. Spouse registration includes entrance to evening receptions, and gala event on Tuesday evening.

**What's New In Titanium**

*Schutz To Be Honored Nace Award continued from page 1*

evaluating titanium alloys, and developing new lower cost and/or optimized corrosion-resistant titanium alloys and products for industrial use. He received his Bachelor of Science degree in chemistry and Master of Science degree in inorganic electrochemistry from the Rensselaer Polytechnic Institute in Troy, New York.

Mr. Schutz has written 80 technical papers and four technical reference book chapters on the subject of titanium alloy corrosion behavior and mechanisms, application and performance guidelines, and new applications for titanium alloys. He holds six U.S. patents on titanium alloy industrial products, and technology for melting/processing titanium. A member of NACE for over 25 years, Mr. Schutz is also a member of ASM International and ASTM International. He received the 1981 NACE A.B. Campbell Award.

Mr. Schutz will present the CORROSION/2003 Speller lecture on Wednesday, March 19, 2003 at 11:30 am.

*NACE International, the Corrosion Society, is a professional technical society dedicated to promoting public safety, protecting the environment and reducing the economic impact of corrosion by advancing the knowledge of corrosion engineering and science. Established in 1943, NACE has more than 16,000 members worldwide and offers technical training and certification programs, sponsors conferences, and produces industry standards and reports, publications and software.*

**Fundamentals Of Titanium Workshop Coming to An Area Near You!**

The Fundamentals Of Titanium: 101 will hold four classes this year. The *Fundamentals of Titanium: 101* is a one day workshop that will prepare you to present and work effectively with job-related functions that involve titanium. You will receive a complete overview of titanium and a thorough grounding in its metallurgy, characteristics, properties and uses. This comprehensive workshop will provide attendees with detailed information on the types, uses, and properties of common titanium alloys. Attendees will leave with an understanding of applied titanium metallurgy fundamentals. Topics covered in this course include: Titanium History, Characteristics, & Manufacturing, Titanium Alloys, Heat Treating, Cleaning & Finishing, Safety, Joining, Forming, Corrosion, Recent Advances, Current Applications, Future Threats and much more!

The cost of the course is $195 and includes the workshop materials, entrance to the course, and lunch.

To learn more about the upcoming locations and dates please email Stacey Jorgensen at sjorgensen@titanium.org.

**Conference Sponsorships Available!**

Present your company as an industry leader at the upcoming Conference & Exhibition. ITA offers sponsorships for every budget, from tote bags to evening receptions. With every event you sponsor your name will be displayed and acknowledged on the ITA website as well as in all conference literature. In addition to the traditional sponsorships, ITA has increased the options so everyone can participate. This is your chance to be a part of that tradition by hosting your choice of “Conference Events” in which all attendees and guests participate!

Visit the conference section of the ITA website at [www.titanium.org](http://www.titanium.org) to see what is available! Sponsorships are handled on a first come first serve basis.

*Can’t remember your member password? Contact Stacey Jorgensen at sjorgensen@titanium.org.*
Technical Discussion Forum

Just when you thought the ITA web site couldn’t get any better, you discovered the ITA Technical Discussion Forum. The Technical Discussion Forum is an excellent opportunity to educate the general public on titanium. This Forum allows individuals to post questions or seek advice on applications involved with titanium.

The openness and transparency of technical information benefits industry at large, a public forum such as this will only be successful if individuals respond to the posted questions. ITA relies on membership to actively participate in assisting with technical questions.

Recent Inquiries - Do you have a comment?

**Technical Discussion Forum**

I am an A Level student from Cheltenham, UK. I was wondering if anyone can tell me about (or give me a good link on the internet to) the structure of titanium, the way the atoms bond and how different arrangements can give different properties. Many

**Technical Discussion Forum**

Just wondering if titanium could be used as a piston liner in automotive engine? The engine is turbocharged so will operate at quite high temp. The liners seat in a cast block and will have water around them to help cooling of the pistons etc. The liners will also be touching each other when seated in the block. Will there be a problem with such an application? Can anyone shed some light on whether the piston rings will seal ok etc?

**Titanium Grade 2**

Please provide the press forming precess reference

information I’d like to have information about titanium deep drawing of Grades 2 and 3.

**Processing Titanium: Pure Titanium?**

I also would like to know the best process to extract the pure titanium from ore. I know there is a magnetic process to get to the luminate stage. I need to know the most cost effective way to do this.

**Cleaning Titanium:**

**CP Grade 2 Surface Finish For Dental Implant**

I like to know if someone knows about the solution that is use with electrolytique polish (I think HCI/H2SO4) what is the proportion of each element and what is exactly the process.

**Specifications: Fatigue Life**

What are the fatigue loading conditions?

Special Note For The Frequent Traveler…

The bulletin board is traveler friendly! For those often on the road, you may check the bulletin board by viewing the topics for a day or week. An overall view of issues can be found by utilizing the tree view icon.

Products For Sale:

Natural Titanium Not Treated.
Name of Company: Rohenes, Inc.
Contact Name: Frank Rohenes, info@rohenes.com

Have available 5,000 MT per month Ilmenite Titaniferous – Not treated (Natural Stage Black Sand) Minimum Titanium 45%. Specs & samples available.

Business Opportunity:

Sales Representative - Santa Fe Springs, CA
Name of Your Company: Titanium Industries, Inc EOE.
Contact Name: B. Paddock, info@titanium.com

Titanium Industries, Inc., the largest independent titanium distribution company in North America, is seeking an aggressive Sales Representative for our Santa Fe Springs, CA Service Center. The ideal candidate should have a college degree & several years of successful metal sales or related experience. Responsibilities include 50% inside sales and service and 50% of time making efficient, cost-effective sales calls on major existing and high potential accounts, forecasting and profitably selling the Company's products and services. Salary commensurate with experience plus a full benefits package. E-mail resume with salary requirements to the attention of B. Paddock at info@titanium.com. No phone calls please. Visit our website at www.titanium.com.

Equipment For Sale:

Titanium Casting Furnaces For Sale
Name of Your Company: Lectrotherm Inc
Contact Name: mikepinney@lectrotherm.com

Description: Have three cold wall induction crucible melting & precision casting systems available on an as-is or refurbished basis. The systems were originally designed to melt and centrifugally cast 25lbs of titanium and titanium alloys. The furnace systems can also be adapted to zirconium and other reactive alloys. The equipment is in very good condition and was originally manufactured by ALD Vacuum Technologies in 1996/97. To receive a full set of specifications, contact 800/633-3584.

Room Reservation Reminder...
The discounted room block rates for the conference are now available at the Doubletree Hotel. To book your reservation contact: 831-649-4511. Book early to receive the discounted room rate of $179. Remember to tell them you are with the International Titanium Association room block! PLEASE NOTE: Room block rates are valid until either the room block is sold out or before September 26, 2003.

Founded in 1984, the International Titanium Association is a nonprofit networking trade association for the titanium industry. The primary focus of the Association is to promote the continued growth of the industry as well as educate the public on benefits and implementation of using titanium. Current membership includes 96 organizations.
