

PEDIATRIC CLINICAL SKILLS LAB OPPORTUNITY

Eligibility

This free 3-day hands-on clinical skills training opportunity is intended for RNs, Advanced Practice Nurses, Physician Assistants, and Physicians working at Tribal or IHS facilities who have already completed a 40 hour Pediatric Sexual Assault Examiner classroom course.

Registration

If you are interested in attending this training, please register at: <http://www.tribalforensichealthcare.org/PedsClinicals>

As this is a one-on-one, hands-on training opportunity, only 10 slots are available. We expect this to be a popular training opportunity so please register ASAP.

After you register and we confirm your eligibility, we will contact you to schedule a date. Participants will be scheduled on a first-come, first serve basis, based upon the date and time you register for this training on the Tribal Forensic Healthcare website.

Travel

All travel arrangements including hotel, airfare, meals and incidentals will be the responsibility of the participant attending the clinical. The clinical experience itself will be free to the participants chosen.

Location

Currently dates are available at Driscoll Children's Hospital in Corpus Christi, TX and Our Kids in Nashville, TN.

Clinical

This Clinical Skills Lab is a 3-day clinical rotation focusing on acute and non-acute pediatric forensic evaluation when concerns of child sexual abuse or sexual assault have been reported. The rotation is based on the core components necessary to achieve best practice standards.

A developmental approach is used in assessing the child, examining the child, and formulating the treatment plan. Learners will participate in a guided clinical rotation in a pediatric health care setting which provides the opportunity for forensic medical evaluation of the child. Learners will also participate in clinical conferences where various pathophysiological and psychological processes encountered with the child and his/her family will be discussed. Learners will explore relevant resources/research related to child sexual abuse and apply findings to individual cases.

Questions?

Please contact Bonnie Barsa (bonniebarsa@forensicnurses.org) with any questions.

Jointly provided by Postgraduate Institute for Medicine and International Association of Forensic Nurses.
