Selected Presentations Examples

LIPID MANAGEMENT
- A Retrospective Study of the Lipid-Lowering Efficacy and Safety of Within-NNRTI Switching in HIV-Infected Patients
- Comparison of Atorvastatin and Ezetimibe/Simvastatin for the Control of LDL-Cholesterol
- Assessing the Impact of Statin Therapy on Ventilator-Associated Biotrauma

INFECTIOUS DISEASE
- Implications of an Antibiotic Restriction Program on the Treatment of Catheter-Related Urinary Tract Infections
- Quality Assurance of a Pharmacokinetic Consult Service for Aminoglycosides and Vancomycin Within a Large Health Care System
- Trends in Treatment of Clostridium difficile Associated Disease in a Community Hospital Setting
- Cephalosporin Cross-Reactivity in Patients with a History of Penicillin Allergy

CARDIOVASCULAR MEDICINE
- Impact of a Pharmacist-Managed Anticoagulation Clinic on Patient Outcomes in a Community-Owned Healthcare System
- Negative and Positive Predictors of Compliance in Patients with Heart Failure
- A Multi-Center Retrospective Study on the Clinical Efficacy and Safety on Lipid Lowering Effects after a Switch to Atazanavir/Ritonavir-based HAART

HEMATOLOGY/ONCOLOGY
- Efficacy and Toxicity of a Second Autologous Peripheral Blood Stem Cell Transplant for Patients with Relapsed or Recurrent Multiple Myeloma
- Evaluation of Leucovorin Rescue and Hydration with High Dose Methotrexate in Pediatric Osteosarcoma Patients
- Evaluation of Polymorphic Differences in RAF Kinase Isoforms Between HER 2-Positive and HER 2-Negative Breast Cancer Patients

DIABETES
- Evaluation of Cost-Effective and Evidence-Based Management of Type 2 Diabetes Mellitus in an Academic VA
- Evaluation of Clinical and Economic Outcomes of a Member Benefit Medication Therapy Management Program with Co-Payment Waiver for High Risk Managed Care Patients with Diabetes
- Assessment of an Intensive Insulin Drip Protocol at a Tertiary Care Hospital

PEDIATRICS
- Maximizing Total Parenteral Nutrition (TPN) in Acute Care Patients in a Pediatric Teaching Institution
- Antibiotic Selection in Treating Pediatric Community Acquired Skin/Soft Tissue Infections Caused by Staph aureus

CLINICAL PRACTICE
- Cost Avoidance Associated with Clinical Pharmacists’ Interventions in the Emergency Department
- Incidence and Prevention of Intravenous Contrast-Induced Nephropathy in an Acute Care Setting

PHARMACEUTICAL CARE
- Development and Implementation of a Pharmacist-Run Medication Education Program Focusing on Adherence to Antipsychotic Agents
- Cost Savings Associated with Formulary management Strategies for Antidepressant Drugs and the Resulting Clinical Implications

AMBULATORY CARE
- Transdermal Fentanyl use in the Emergency Department
- Evaluation of the Quality of Care of Patients with Depression in a Family Medicine Primary Care Practice
