Flower Mound Student Tops In Trig*Star

Flower Mound High School’s Adeesh Jain is the 2013 Texas Trig*Star Contest winner. Flower Mound is a part of TSPS Dallas Chapter 5.

Jain, the student of Ms. Mary Walker, scored 100 points on the exam in a completion time of 13:18. Jain will now participate against national competitors in the NSPS National Trig*Star Contest.

The Second Place Winner in the Texas Trig*Star Contest was Zeke Reyna, of John Jay High in San Antonio (TSPS Alamo Chapter 11), who scored a 76 in a time of 17:23. His teacher is Ms. Susan Hernandez.

More than 280 students from seven schools participated in this year's Texas Trig*Star. Those schools came from Dallas Chapter 5, Alamo Chapter 11, Paso Del Norte Chapter 17 and Panhandle Chapter 16.

TSPS Chair Abner Martinez began the year by distributing Trig*Star Introductory Packets to all available TSPS Chapter Presidents. With the help of interested chapter sponsors, sample test information and solved sample problems were made available to students and teachers to help them prepare for the test.

Chapters interested in partnering with their local high schools for next year’s Trig*Star contest can learn more by visiting http://tsps.org/education/trigstar-program.

In 1983, The NSPS Board of Governors embraced the Trig*Star program as proposed by a North Dakota ACSM representative, and in 1984 packets were sent around the country for land surveyors to facilitate local Trig*Star contests. A National Contest was approved in 1993. More information can be found at http://nsps.us.com.
TSPS honors Mr. T.J. Chapman, Jr. with a Final Point Ceremony on Saturday, July 13 at 10:30 a.m. at the Rose Hill Cemetery, located at the intersection of S. Broadway (U.S. Hwy. 69) and Troup Highway in Tyler, Texas. The cemetery entrance is located on S. Donnybrook Avenue, which is one street east of S. Broadway.

Mr. Chapman, RPLS No. 1319, passed away Tuesday, December 18, 2012 in Tyler. He was a Life Member of TSPS and a Past President (1972). He was also a member of the Masons, the Scottish Rite and was a Shriner. Mr. Chapman served in the United States Navy and worked as Chief Surveyor and Landman for 25 years in the Land Department for Shell Oil.

New "All In" Program to Strengthen Surveying Profession's Voice

NSPS Open Letter Encourages State Association Participation

(Editor’s Note - On May 4, the TSPS Board of Directors approved the following motion: The following language be placed on the 2013 TSPS Election Ballot.

"WHEREAS, the Board of Directors of the Texas Society of Professional Surveyors (TSPS) recognizes that through a strong membership the Society represents the profession of land surveying in the State of Texas, and WHEREAS, the Board of Directors of TSPS also recognizes that the singular organization that represents the land surveying profession at a National level is the National Society of Professional Surveyors (NSPS), and WHEREAS, NSPS has offered to each State Affiliate the opportunity to participate in the "100% State Affiliate Membership Program" at an annual cost of $40.00 per registered voting member, and WHEREAS, the Board of Directors of TSPS supports the NSPS "100% State Affiliate Membership Program,"

DO YOU SUPPORT TSPS PARTICIPATION IN THE NSPS "100% STATE AFFILIATE MEMBERSHIP PROGRAM"?

YES ______. NO ___________.

This is a non-binding referendum vote of support for this initiative. A vote for TSPS dues increase to facilitate may be held at the 2013 Annual Meeting."

In the coming weeks, you’ll learn more about this issue, and watch for an exhaustive piece on the initiative in the July Texas Surveyor magazine. Following is a first word on the initiative from NSPS, which sent this open letter to all state land surveying societies.)

Greetings fellow surveyors,

As you know, NSPS is currently offering a 100% “All In” membership program at a modest cost that will unify the surveying associations throughout the United States. This program will strengthen the Survey Professional’s collective voice and enhance our national influence. In order to protect the future of our profession, the surveying community must become pro-active and unify ourselves within an organization that represents, as near as possible, 100% of the surveying profession. The program is having considerable success but still has a ways to go. Currently, 22 State Societies have gone “all in”; expanded the membership rolls of NSPS from less than 3,000 to more than 10,000. Once the rest follow suit and sign the Memorandum of Understanding (MOU) – membership in NSPS will grow to about 30,000. So, we invite your society to join us in this endeavor.

One of the new benefits of joint membership is a seat on the NSPS Board of Directors. Additionally, our new communications consultant, Flatdog Media, and our new legislative affairs consultant, John M. Palatiello & Associates, will help us increase our influence in government affairs and public relations.

We have faced many challenges in 2012, and our collective effort in addressing those challenges is the only way we will succeed. Whether it is the threat to high precision GPS users, as evidenced by the LightSquared issue; the successful repeal of an onerous and unnecessary tax on businesses that provides services to government entities; or keeping our steady hand on the future direction of our profession, it is critical that we work together. Nothing is going to happen in Surveying without leadership and that national leadership is the National Society of Professional Surveyors.

Friends, this is your opportunity to make a difference! Don’t let it slip away. It is up to us all to protect the future of surveying. We will educate the general public that surveyors are the land boundary experts and that land surveyors have always held the role of evaluating evidence, locating property boundaries, and establishing new property lines. We will enhance our influence and our focus attracting young folks into the profession. We will remind ourselves and the public just how broad the umbrella known as “Surveying” is, covering Data Management, Geomatics, GPS, GIS, Geodesy, Construction Surveying, Photogrammetry, Hydrology, and all the other myriad technologies. These are the challenges before us. Please count yourself “IN” for guiding the way forward for our profession, which as we all know, is - the greatest profession in the world!

As Benjamin Franklin said, “We must all hang together or we shall most assuredly all hang separately!” and as Dave Doyle said, “We may be on the verge of seeing some significant changes in the traditional perspective of how some boundaries can be defined, along with the capability for almost anyone on the planet with a modest investment in GNSS technology to know where they are within the size of the palm of their hand. It’s an exciting time.”

Thank you and best regards to you all.

National Society of Professional Surveyors

**Surveying, Texas Style**

**Classic video now on TSPS YouTube Channel**

Check out the classic TSA/TSPS video production "Surveying, Texas Style" now posted on the TSPS YouTube channel page TSPSTX.

The video was produced by the TSA Public Relations and Information Committee, then chaired by Tommie Anderson, with Vice Chair Ben Thomson.

While visiting TSPSTX, also check out "Surveying by GISD" and "Your Career as a Land Surveyor" and share them with your friends and colleagues.

---

**Auction Brings TSFI $5,000**

TSPS members gathered May 4 on a perfect afternoon in Austin to invest in the future of Texas land surveying.

This year's Ray Wisdom Auction, benefiting TSFI scholarships for Texas land surveying students, was held at Richard Moya Park in Austin following the TSPS board meeting. Just under $5,000 was collected for students studying for a career in the profession.

After a barbecue dinner, Auctioneer Dempsey Hannah led surveyors through the bidding on items donated by individuals and TSPS chapters. The auction is a highlight of the Second Quarterly Board Meeting each year, and this year's earlier date provided cool temperatures to make the picnic and auction even more enjoyable.

Thanks again to those individuals, businesses and chapters who donated or purchased auction items. Click TSFI for more information about TSFI and scholarships for land surveying students.

**Surveying News Around Texas**

**Texas Firm Celebrates 35 Years of Engineering & Surveying**

Austin—On June 1, McKim & Creed, Inc., one of the largest engineering, surveying and planning firms in the U.S., celebrated 35 years of providing the “most responsive and dependable service all the time.” The company has offices in Austin, Houston, Dallas/Fort Worth and San Antonio.

The firm first specialized in structural engineering, working primarily for local architects. But over the next three decades, McKim & Creed expanded its services to include civil, mechanical and electrical engineering, surveying, and land planning. Market sectors shifted from heavy industrial to municipal water, wastewater and reclaimed water, transportation, energy utilities, and land development.

Today, McKim & Creed’s 400 employees work in 20 offices located throughout North Carolina, Florida, Virginia, Georgia, Michigan and Texas. Nationally, McKim & Creed is included among the top 500 design firms and the top 200 environmental firms in the U.S. by Engineering News-Record.

McKim & Creed established its Texas presence in 2012, and has worked with the Texas Natural Resources Information System (TNRIS) to provide light detection and ranging (LiDAR) for 4,542 square miles in Ellis, Navarro, Wilson and Karnes Counties; with Hodde & Hodde Land Surveying, furnishing LiDAR imagery and planimetric mapping in Henderson; and with the City of Missouri City providing planimetric updates.

Click on "Convention & Tech Expo" on the menu at the top of the page for all your Convention news! Exhibits & Attendee Registration information will be added soon.

Featured CEU Class Speakers

Distinguished speakers and course presenters headline the educational sessions at 2013 Convention. Full bios of speakers are available at www.tsps.org, and here's a quick look at CEU courses on tap for attendees:

- Avoiding Boundary Problems – Gary Kent
- Thinking Beyond Technology – Dennis Mouland
- The New Act & Rules – Garey Gilley
- Client Communication – Bill Beardslee
- Easements & Rights of Way – Gary Kent (8 CEUs)
- Ethics for the Professional Surveyor – Dennis Mouland
- The Pincushion Effect – Jeff Lucas (8 CEUs)
- Survey Cost Analysis – Bill Beardslee
- RTK Basic Operation & Troubleshooting – Chris Nelms
- Proposal Writing – An Art & Science – Bill Beardslee

(All courses 4 CEUs unless noted otherwise.)

Convention Special Events

Dave Halston (top photo) and The Little Big Band will perform at this year's Masquerade Ball & Awards Gala, slated for Friday, November 1. Read more at www.tsps.org about Dave, about this year's Golf Tournament at Tierra Verde Golf Club (right) and other convention special events.
Moore Tornado Relief Effort

(From a letter from the Oklahoma Society of Land Surveyors to TSPS members and land surveyors across the country)

The Oklahoma Society of Land Surveyors would like to encourage all surveyors to support the relief effort for the Oklahomans affected by the tornado that hit Moore, OK on May 20.

Please click on the link below and see how you can make a difference immediately.

MOORE TORNADO RELIEF EFFORT

Also several of our members have contacted us about how they might be able to help with any reconstruction efforts in the City of Moore that has been devastated by the May 20 tornado.

The Oklahoma Society of Land Surveyors has been in contact with the City of Moore and has offered services from our members to perform any surveying tasks that the City may need in the coming days and weeks.

Some of these services may include:

• Easement location for utility repair/relocation
• Survey control monuments for future infrastructure work
• Property locations/relocations
• Floodplain administration
• Roads and rights of way
• YOU NAME IT!

Watch your email for an update on the needs and thank you all for contacting us offering your services.
