Press Release – UK Oracle User Group Partner of the Year Awards 2019/20 Winners Announced

Winners of the 12th year of the UKOUG Oracle User Group Partner of the Year Awards revealed

4 October 2019: UK Oracle User Group (UKOUG) has revealed the winners of this year's Partner of the Year Awards.

The awards provide recognition to UKOUG Partners for the contribution that they make by offering their services to Oracle users. The winners are decided exclusively by Oracle customers to portray a true reflection of the view of the community and recognise the value that partners bring to end users. With just under 1000 customers voting in this year's awards, the community really did have their say.

Each year, the Partner of the Year working group review all categories to ensure continued relevance and value. This year, the awards have been aligned to the ever-changing Oracle landscape, catering to specific product areas. From this, 15 categories were created for partners to nominate themselves in.

The ceremony took place at the Kimpton Fitzroy Hotel on 3 October where the shortlisted organisations with the highest number of votes were awarded either bronze, silver or gold.

For more information on the evening, visit the UKOUG Awards website.

About: UK Oracle User Group

UK Oracle User Group (UKOUG) is an independent, not for profit membership organisation created to support Oracle stakeholders. Established over 30 years ago, UKOUG now has over 8,500 member contacts. It leverages on the collective strength of the combined Oracle community, acting as a single independent voice to influence the future design, functionality and technology that is key to all Oracle users.

UKOUG provides the Oracle community with over 40 events a year across the UK and Ireland to inform and educate its members about Oracle products and new developments. All of its events enable members to network, share knowledge, participate, feedback to Oracle and meet senior Oracle representatives and other industry leaders. UKOUG Conferences are largest collection of independent Oracle events in EMEA.
